COMMUNITY 84

At Ticket to the Moon, we have been on a mission to empower dreamers worldwide since 1996. We are committed to inspiring individuals to live life to the fullest by providing durable, sustainable adventure solutions crafted with attention to detail and a passion for excellence.

Since our inception, we have been dedicated to production practices which are ethical, sustainable, and support community progress. Our production is rooted in Bali and we craft our products using materials sourced from across the Indonesian archipelago. We ensure that all of our team members are treated with **respect, equitability, and fairness**. To that end, every TICKET TO THE MOON family member receives, social security, pensions, and wages well above the regional norm. A substantial part of our profit is also shared annually with our employees, proportionate to their time with us and their impact. These things help to create a loving and dedicated working culture.

REDUCING OUR CARBON FOOTPRINT

Guided by a deep respect for nature, we are committed to eco-conscious practices: using **local materials, minimizing waste**, and investing in innovative **re- and upcycling techniques**. This approach shapes every part of what we do — from product design and packaging to local manufacturing. Leftover fabrics are never discarded; instead, they are transformed into new, eco-friendly items or recycled for future use. Our dedication to reducing our environmental impact is rooted in a simple principle: **“Nothing is wasted — because we care.”**

HOW WE DO IT...

Sustainability is at the heart of what we do. At Ticket to the Moon, we take real steps to reduce our environmental impact by:

Solar-Powered Production – Expanding solar energy in our factories to cut emissions.

Lower Carbon Footprint – Optimizing logistics, reducing waste, and using more recycled and upcycled materials. Additionally, we have signed our SBTi targets and are therefore committed to reduce our overall carbon footprint.

Waste Reduction – Repurposing fabric scraps into Eco Bags, Sling Bags, and accessories, while recycling all end-of-life materials and collaborate with recycling facilities.

FAIR PRODUCTION

Our long-term goal is to raise awareness of larger global challenges and fair production issues. In all our operations, we aim to bring advancement to the community while respecting and supporting the local social structures. **ACT LOCAL!** Most of our partners and materials originate from Indonesia — our beloved nest and home. Ticket to the Moon is not only a brand but also a factory! We have **200+ team members** working across **4,000 m² of production space** and are proudly crafting all products on the island of Bali. Since the beginning of this year, all upcycled items include a '**Made By**' label to create a more personal link between customer and maker.

At Ticket to the Moon, we're committed to offering products that are not only **innovative** and **high-performing** but also gentle on both your skin and the environment. Our fabrics are completely **PFC-free** and certified according to the **OEKO-TEX® Standard 100**. This means they have been tested for harmful substances and are proven to be safe in human ecological terms. This commitment ensures our products are **skin-friendly** and **safe for everyone** – including children and those with sensitive skin.

FAIR PRODUCTION

Join us in **reducing our impact on the planet**. With a commitment to local sourcing, resource-efficient production, and **innovative upcycling** methods, we offer durable, high-quality products with genuine ecological value. Experience the benefits of local value creation and thoughtful packaging design. Every leftover material finds new life in our **upcycled collection** or is recycled into fresh fabrics. Explore our sustainable practices and make a difference today.

We are committed to maintaining the highest standards of **sustainability and environmental responsibility in our production**. A portion of the materials used in our products is bluesign® certified, ensuring they meet stringent criteria for resource efficiency, consumer safety, and minimal environmental impact. Additionally, our entire product line is **OEKO-TEX® Standard 100 certified**, guaranteeing that every component is tested for harmful substances and meets globally recognized safety standards. To further strengthen our commitment to responsible manufacturing, we are in the process of **obtaining ISO 9001 and ISO 14001 certification**. These will enhance our quality management systems and reinforce our dedication to sustainable business practices.

Since day one, we have defined ourselves not only as a manufacturer of feel-good products, but also as an advocate for socially responsible production conditions and **fair trade at all levels**. Together with the fair trade movement, we share the vision of more justice, transparency and sustainability in international trade (World Fair Trade Organization, 2009).

PARACHUTE HAMMOCKS

Since 1996, TICKET TO THE MOON has been the original parachute nylon hammock manufacturer. Designed and created by travellers for travellers, our hammocks are tested in all climates around the world and are equally suitable for a serious expedition, as well as daily use. Once you try a Moon Hammock, you'll never miss your tent again! Enjoy a comfortable sleep and «off the ground» protection from water, insects and small animals. Ticket to the Moon parachute hammocks have many practical features: light- weight yet robust, spacious but portable, quick to set up and take down (in under a minute), rot-resistant, machine washable and fast drying.

The elastic and breathable nylon adapts perfectly to your body, promoting optimal blood circulation and relaxation. Hanging a hammock is often permitted where pitching a tent is not — making it the perfect choice for spontaneous adventures. Each hammock comes equipped with stainless steel S-hooks or high-grade aluminium carabiners. Whether you're travelling, spending a day at the park with friends, or simply relaxing at home — our hammocks are ideal for any occasion. Play, relax, take a nap, or sleep through the night in your Moon Hammock!

EXPRESS SETTING BAG

This unique and versatile feature comes with all our hammocks and greatly enhances their functionality. It allows for quick and easy setup and takedown.

HAMMOCKS TECHNICAL LINE

Lightest | Lightest Pro | Pro Hammock
| Mat Hammock | Pro Mat Hammock

When going far — or if every gram counts — even a conventional travel hammock might be too heavy. Some simply love the idea of having a hammock that can truly go anywhere, anytime, without having to leave anything else behind.

After years of searching for an even lighter fabric that still offers the safety and comfort Ticket to the Moon is known for, we're excited to introduce our Lightest Hammock.

It's an ultralight setup made from a locally produced, recycled high-performance crinkle nylon textile. This award-winning packing wonder features a full-length hammock body (300 cm) and is perfectly suited for taller users — without compromising on comfort.

It weighs only 220 grams — including the express setting bag. Equipped with 6kN mini-carabiners and special UHMWPE-rope, it literally fits into your pocket.

HAMMOCKS ACCESSORIES

Moon Tarp | Fullmoon Tarp | Lightest Tarp |
Bug Net 360° | UV Sleeve | Ridgeline | Pegs Set

Moonquilt Allround – Compact – Pro 650 – Pro 850 | Moonblanket Compact – Pro 650 – Pro 850

MOON TARP

(TMTARP05)

Material	PU — Coated Ripstop Nylon (2000 mm water column)
Min. Weight	775 g (4× guy ropes)
Max. Weight	845 g (8× guy ropes, 2× pegs)
Size	250 × 250 cm
Diagonal	350 cm
Guy rope: Blue	2 × 2.5 m
Yellow	4 × 2 m
Orange	2 × 1 m (Incl. 8 carabiners & 8 quick-release-tension-buckles, 2× pegs)

This diamond-shaped tarp can be used with standard hammocks or on its own as instant protection from the elements. Reinforced, seam-sealed ridgeline, corners and tie-out points make it highly durable and adaptable. Blue-colored ridgeline tie-outs with carabiners ensure easy orientation and quick setup. Four additional eyelets allow for various setup modes using extra cordage or poles. The adjustable guy lines are stored in convenient, breathable corner pockets for safekeeping.

- Waterproof (2000 mm)
- Fits all TTTM hammocks—except Honeymoon and Mammock
- Shields from rain, sun and wind
- Includes 2× Y-shaped 18 cm aluminium pegs and 8 adjustable guy lines
- Quick-release buckles for easy setup
- Compact and lightweight
- Comes in a Moon Pouch + with waterproof roll-top bag for safe transportation
- Contrast-colored ridgeline with carabiners for easy setup
- Mesh pockets for storing all guy lines

FULLMOON TARP

(TMFMTARP)

Material	P20D Recycled Ripstop Sil-Nylon (1500 mm water column)
Min. Weight	585 g
Max. Weight	750 g (incl. 16× guy ropes, 6× pegs)
Size	320 × 280 cm
Diagonal	424 cm
Guy rope: Blue	2 × 2.5 m
Yellow	8 × 1.5 + 2 × 0.35 m
Orange	4 × 1 m (Incl. carabiners & quick-release-tension-buckles)

Easily packable in its roll top bag

The Fullmoon Tarp is an advanced all-weather shelter that can be set up in a variety of configurations. Whether as an A-frame, tent-like cover in challenging weather, or as a diamond tarp offering maximum airflow and visibility in milder conditions — we've got you covered. Thanks to its durable, high-grade 20D Sil-Nylon fabric, this tarp is not only fully waterproof and lightweight, but also impressively quiet, even in heavy rain. Ridgeline and extra tie-out points are already seam-sealed. No need for you to worry about it.

- Waterproof (1500 mm)
- Fits all TTTM hammocks — except Honeymoon and Mammock
- Protection from rain, sun and wind
- Includes 6× Y-shaped 18 cm aluminium pegs and 14 adjustable guy-lines
- 16 Quick-release buckles for easy set-up
- Compact and lightweight
- Comes in a Moon Pouch + with waterproof roll-top bag for safe transportation
- Contrast-colored ridgeline with carabiners for easy setup
- Mesh pockets for storing all guylines

LIGHTEST TARP

(TMLTARP)

Material	20D Recycled Ripstop Sil-Nylon (1500 mm water column)
Min. Weight	395 g (4× guy ropes)
Max. Weight	470 g (8× guy ropes, 2× pegs)
Size	250 × 250 cm
Diagonal	350 cm
Guy rope: Blue	2 × 2.5 m
Yellow	4 × 2 m
Orange	2 × 1 m (Incl. 8 carabiners & quick-release-tension-buckles 2×)

Fast protection from rain, sun, and wind — while keeping weight to a minimum! Install it high for maximum shade and airflow, or low to keep rain and wind at bay. Reinforced sides, corners, and tie-out points make this minimalist piece of gear impressively sturdy. The 20D Sil-Nylon material allows the Lightest Tarp to offer full functionality. It features quick-release tension buckles on all four corners, comes with two pegs, and includes four additional tie-out loops. The blue-colored ridgeline tie-outs with carabiners ensure easy orientation and fast installation. Ridgeline and extra tie-out points are already seam-sealed.

- Waterproof 1500 mm
- Fits all TTTM hammocks — except Honeymoon and Mammock
- Shields from rain, sun and wind
- Includes 2× Y-shaped 18 cm aluminium pegs and 4 adjustable guy-lines
- 8 Quick-release buckles for easy set-up
- Compact and lightweight
- Comes in a Moon Pouch + with waterproof roll-top bag for safe transportation
- Contrast-colored ridgeline for easy setup with carabiners
- Mesh pockets for storing all guy lines

UNIVERSAL BUG NET 360°

(TMNET)

White
(TMNET01)

Black
(TMNET07)

Green
(TMNET24)

Would you like full protection and great functionality with minimal weight? This versatile 485 g bug net ensures you won't get bitten from below, thanks to its smart 360° setup. It's compatible with standard hammocks (without spreader bars) and fits all of our 3-meter-long hammock models.

The soft yet durable polyester mesh keeps out even the tiniest insects, snakes, rodents, and other critters. The fully convertible top opens quickly with double circular zippers — offering extra freedom of movement or increased airflow when needed. Stuff a shirt into the soft pouch to turn it into a pillow. For stargazers, we recommend the black net.

Material	Polyester
Netting	200 mesh openings/cm ²
Weight	485 g
Size	300 × 130 cm

- Double zipper opens entire top
- Includes adjustable (non-structural) ridgeline
- 360° protection
- Extra fine mesh (200 holes/cm²)
- Washable at 30°C
- Mildew resistant
- Compact and lightweight

MOONQUILT ALLROUND

(TMMQA51)

Outer material	Recycled -Crinkle Nylon 20D 44 g/m ²
Inner material	Upcycled Crinkle Nylon 70D 64 g/m ² (from hammock fabrics)
Weight	1280 g (1120 g quilt + 100 g hood + 60 g storage bag)
Size	200 × 140 cm
Filling	115 g/m ² 100% RPET Insulation ECODOWN by Thermore®
Moonquilt Temp. Range	limit comfy 3 5 20 °C

The Allround is the successor to our original Moonquilt — and its name says it all. More than just one of the best underquilts on the market, it offers impressive versatility. In windy conditions, you can zip up the recycled synthetic three-season underquilt, allowing it to fully envelop you and your hammock. Dual zippers and adjustable elastic shock cords let you easily regulate insulation from inside your hammock. Small corner pockets keep cords and mini carabiners neatly stowed when you're using it as a sleeping bag or blanket.

- Detachable hood, Machine washable at 30°C
- Mildew-resistant & water-repellent
- Can be used as underquilt or blanket (all in one solution)
- Also works as a sleeping bag (even around the hammock)
- Includes a storage bag made from upcycled mosquito netting

MOONQUILT COMPACT

(TMMQC51)

Outer material	Recycled -Crinkle Nylon 20D 44 g/m ²
Inner material	Upcycled Crinkle Nylon 70D 64 g/m ² (from hammock fabrics)
Weight	845 g (790 g quilt + 55 g bag + 60 g storage bag)
Size	210 × 135 cm
Filling	115 g/m ² 100% RPET Insulation ECODOWN by Thermore®
Moonquilt Temp. Range	limit comfy 3 5 20 °C

The Moonquilt Compact is a minimalist yet comfortable, ready-to-use three-season underquilt. Made primarily from recycled materials, it pairs perfectly with standard hammocks and our Moonblankets.

- Detachable hood, machine washable at 30°C
- Mildew-resistant & water-repellent
- Can be used as underquilt or blanket (all in one solution)
- Also functions as a sleeping bag (even around the hammock)
- Includes a storage bag made from upcycled mosquito netting

MOONQUILT PRO 650

(TMMQP651)

Outer material	20D Crinkle Nylon Downproof
Inner material	20D Crinkle Nylon Downproof
Weight	740 g (695 g quilt + 45 g bag + 60 g storage bag)
Size	210 × 135 cm (115 cm in the middle)
Filling	NHD® certified in RDS® (650 fill power; 280 g down)
Moonquilt Temp. Range	limit comfy -2 2 20 °C

650 FP

- Ethically sourced, high-performance duck down
- Compatible with standard hammocks
- Lightweight and compact
- Water-resistant: retains insulation and breathability even when damp
- Exceed 10,000 minutes on the industry IDFB 18A Shake Test — equal to 7 days of continuous water exposure
- Includes a storage bag made from upcycled mosquito netting

MOONQUILT PRO 850

(TMMQP851)

Outer material	20D Crinkle Nylon Downproof
Inner material	20D Crinkle Nylon Downproof
Weight	795 g (750 g quilt + 45 g bag + 60 g storage bag)
Size	210 × 135 cm (115 cm in the middle)
Filling	NHD® certified in RDS® (850 fill power; 325 g down)
Moonquilt Temp. Range	limit comfy -8 -2 15 °C

850 FP

- Ethically sourced, high-performance duck down
- Compatible with standard hammocks
- Lightweight and compact
- Water-resistant: retains insulation and breathability even when damp
- Exceeds 10,000 minutes in the industry-standard IDFB 18A Shake Test — equal to 7 days of continuous water exposure
- Includes a storage bag made from upcycled mosquito netting

As the first company in Bali with a license to import down, we didn't waste any time — and are proud to introduce this unique duo of down underquilts. Available in 650 and 850 fill power, both models use ethically sourced duck down with Nikwax hydrophobic DWR treatment and RDS certification, ensuring maximum performance and peace of mind.

The 650 model offers reliable comfort down to 2°C — even for sensitive sleepers — while the Pro 850 keeps you warm and cozy even below freezing. To keep weight to a minimum, we've used our ultra-soft 20D lightweight fabric throughout.

MOONBLANKET COMPACT

(TMBCOM51)

Introducing our new Topquilts — for next-level adventures, hammock or not. The perfect companion (or upgrade) to your trusted Moonquilt.

Designed to keep you warm and cozy, these Topquilts are much more than just hammock gear. Whether you're camping, traveling, or just enjoying the great outdoors, you'll find them surprisingly versatile — and worth packing even when your hammock stays home.

Outer material	70D Crinkle Nylon (upcycled material from hammock fabrics)
Inner material	20D Crinkle Nylon
Weight	810 g (755 g blanket + 55 g bag)
Size	205 × 135 cm
Filling	115 g/m ² 100% RPET Insulation ECODOWN by Thermore®
Moonblanket Temp. Range	limit comfy 0 5 20 °C

- Lightweight and convertible design
- Machine washable at 30°C
- Made from high-performance materials
- Compatible with standard hammocks
- Water-resistant: maintains insulation and breathability even when damp
- Includes a storage bag made from upcycled mosquito netting

MOONBLANKET PRO 650

Outer material	20D Crinkle Nylon Downproof
Inner material	20D Crinkle Nylon Downproof
Weight	740 g (655 g blanket + 45 g bag + 60 g storage bag)
Size	205 × 135 cm
Filling	NHD® certified in RDS® (650 fill power; 280 g down)
Moonblanket Temp. Range	limit comfy -3 2 20 °C

- Lightweight and convertible design
- 650 Fillpower duck down (Nikwax hydrophobic DWR and RDS certified)
- Made from high-performance materials
- Compatible with standard hammocks
- Water-resistant: maintains insulation and breathability even when damp
- Exceeds 10,000 minutes in the industry-standard IDFB 18A Shake Test — that's 7 days of constant water exposure

Material	100% Nylon
Breaking strength	>580 kg

An extremely durable, sturdy, and safe rope hanging system. This minimalist innovation — invented by Ticket to the Moon over 25 years ago — changed the hammock world forever. It allows anyone to hang a hammock within seconds, no knots needed. But if you want to, you can still add your own ;).

(Two pieces per pouch!)

MOON STRAP

(TMSTRAP)

Length	2.7 m
Width	2 cm
Weight	216 g
Max. load	300 kg
Material	100% Polyester
Breaking strength	>760 kg

This daisy-chain webbing is ultra-strong, anti-slip, and incredibly easy to use. It's ideal for trees with sensitive bark or for hammocks shared by more than one person.

(Two pieces per pouch!)

LIGHTEST STRAP

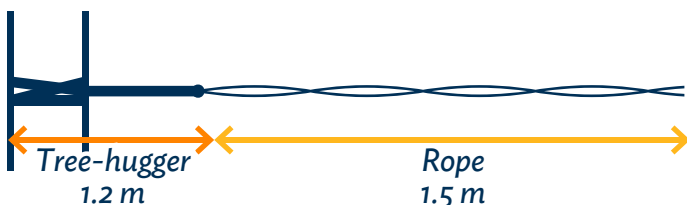

(TMLSTRAP)

Full length	2.7 m
Tree-hugger	L: 1.2 m W: 2 cm L:
Rope	1.5 m Ø 3 mm
Weight	100 g
Max. load	200 kg
Strap material	100% Polyester (PES)
Rope material	UHMWPE
Breaking strength	>400 kg

Weighing just 100 g, this tree-friendly and easy-to-use suspension system is perfect when every gram counts. Made from durable UHMWPE rope, it's built to last. It even fits into the express bag of our lightest hammock — and comes as a pair.

(Two pieces per pouch!)

TREE FRIENDLY EXTENDER

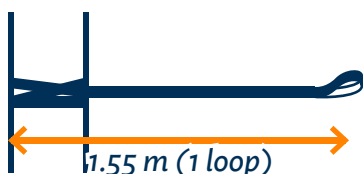

(TMTFE)

Length	1.55 m
Width	2 cm
Weight	105 g
Max. load	300 kg
Material	100% Polyester
Breaking strength	>760 kg

Ever been just 10 cm short of reaching the perfect hammock hang? Sometimes trees are thicker or farther apart than expected — and that's where the Tree-Friendly Extender comes in. This pair of durable polyester straps makes it easy to extend or upgrade your Lightest Straps, Moon Straps, or classic Ropes.

(Two pieces per pouch!)

TREE FRIENDLY EXTENDER PLUS

(TMTFEP)

Full length	1.5 m
Weight	240 g
Max. load	500 kg 100%
Strap material	Polyester
Breaking strength	>1200 kg

You want to be absolutely sure that the trees are only hugged and not hurt when installing your hammock? A Pair of Tree Friendly extenders are optimized for permanent setups, for trees with sensitive bark and for all those who would like to give extra love to trees. They are compatible with all standard attachment systems.

(Two pieces per pouch!)

HANGING KIT

(TMWALL)

Back from your travels? Why not set up your hammock in the living room? It's the perfect spot to read a book, plan your next adventure, or simply unwind and relax. Suitable for use on concrete, brick, and wood surfaces.

Max. load
Material

200 kg
Stainless Steel

- Set of 2 hangers
- Includes 2 screws, washers, and wall plugs
- Packaging designed for slat-wall display

Dear bike-packers and cycling enthusiasts! This brand-new innovation might entirely change your next trip! All you need to get horizontal in your favorite travel hammock is a single tree or anchor point, your bike and the TTTM 2ND TREE.

In almost no time, the pegs are safely placed in the ground, serving as an anchor. They are then attached to the bike in a stable triangle shape that will keep your setup stable and safe. Enjoy the flexibility and get the most out of your adventures!

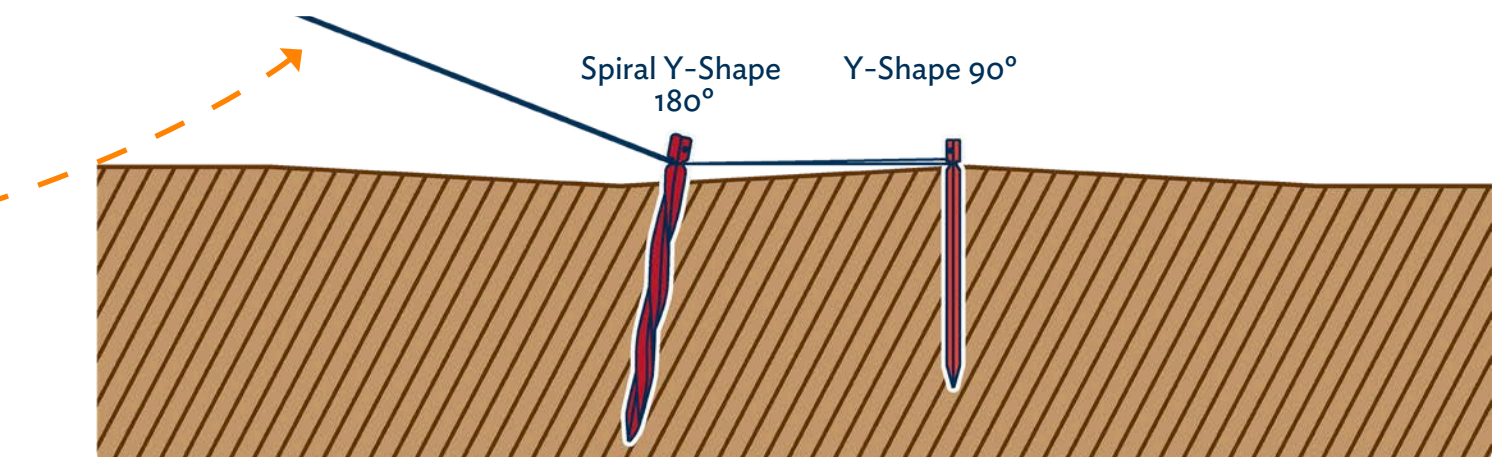

2ND TREE can be used with a weak tree, your trekking poles, any wooden pole or even with a motorbike too!

- 2× UHMWPE Whoopie Slings 2,3 m
- 3× 25 cm spiral Y-shaped pegs AL7075
- 3× 18 cm Y-shaped pegs aluminium
- 3× UHMWPE Loops 20 cm
- 1× UHMWPE Loops 30 cm
- Max. Weight 198 g
- Min. Weight 98 g (2 pegs + 1 Whoopie Sling+ loops)

Make sure you do a proper set up position!

UV SLEEVE

(TMHSUV)

Protects your hammock like a second skin from dirt, sun and wind. An essential, but optional accessory if you plan to leave it in UV light for an extended time. It keeps your hammock clean and stops the wind from flapping it around when not in use.

RIDGELINE SET

(TMRIDGE)

Material	PU Coated 3 mm UHMWPE rope
Weight	80 g
Length	220 - 320 cm
Max. Load	200 kg
Breaking strength	450 kg

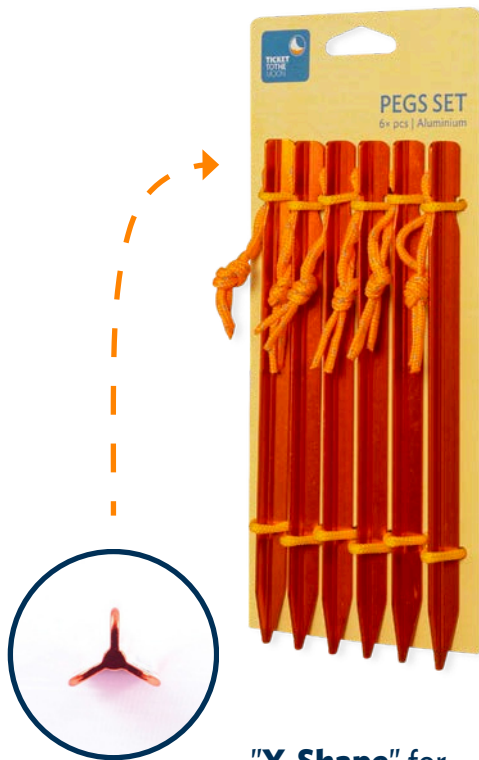

- UHMPE adjustable ridgeline 220 - 320 cm
- 2x 6kN carabiners
- Organizer (6 compartments)
- Stainless-steel rings
- White mesh pocket (doubles as light diffuser)

With this structural and adjustable ridgeline kit, you will certainly hang like a pro and find your perfect position-everywhere and always! Installation is super easy, and you will sleep much better! A clever fusion of state of the art materials and locked Brummel eye splice loop and whoopie sling technology make this new accessory attractive for everyday use. With two 6kN carabiners (7075 aluminium) it can be attached to the hammock and by simply holding and pulling on the handles, it can be shortened and extended to a maximum length of 320 cm.

PEGS SET

(TMPEG6Y)

Length	18 cm
Width	12 mm
Weight	12.8 g
Material	Aluminium

"Y-Shape" for extra strength!

- **Y-Shaped Design:** The unique Y-Shape not only increases the surface area for a firmer grip in the ground but also provides excellent resistance against pulling out, making your setup more secure
- **Durable Construction:** Made from premium aluminium, these pegs are built to last. Whether you're setting up a hammock tarp, a tent in the backyard or securing a shelter in the backcountry, these pegs are designed to withstand the elements
- **Lightweight & portable:** At just 12.8 grams per peg, these are among the lightest on the market, ensuring your load is lighter without compromising on performance
- **Multi-Purpose Use:** Ideal for camping, hammocking, hiking, backpacking, cycling, and any outdoor activity where a secure hold is essential

WHOOPIE SLING

(TMWHOOP)

Length	35 - 200 cm
Weight	23 g
Max. load	200 kg
Material	Ø 3 mm UHMWPE rope

Upgrade your outdoor relaxation setup with the Whoopie Sling, the ultimate adjustable suspension rope designed for effortless and secure hammock hanging. Engineered for versatility and strength, this lightweight rope system features a fully adjustable loop mechanism, allowing you to fine-tune tension and length without tying a single knot.

CARABINER 10 KN

(TMBINER10)

Size	6 × 3.9 cm
Material	A7075 T6
Weight	14.5 g/pc
Closed 	10kN
Opened 	3.5kN

If you like attaching gear to your hammock — or want extra safety for your joyfully playing children — consider upgrading to our weight-rated carabiners. Recently redesigned for even better security and reduced weight, they offer both peace of mind and added convenience when setting up your hammock.

Includes two pieces per pack!

CARABINER SET 22 KN

(TMBINER22)

Size	8.5 × 5.2 cm
Material	A7075 T6
Weight	34.4 g/pc
Closed 	22kN
Opened 	7kN

If you're looking for an extra level of safety, this carabiner is the perfect choice. Its added strength lets you easily open the gate — even while two dreamers are relaxing in the hammock.

Includes two pieces per pack!

CARABINER SET 6 KN

(TMBINERo6)

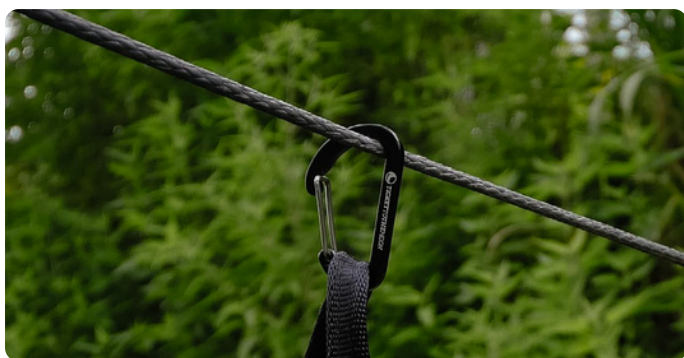

Size	4.5 × 2.6 cm
Material	A7075 T6
Weight	6 g/pc
Closed 	6kN
Opened 	1.5kN

We designed this carabiner to be our most lightweight option — without compromising strength. With a closed gate rating of 600 kg, it's strong enough for any situation. The custom eyelet is perfectly suited for ropes like our UHMWPE lines. Ideal for the Lightest Hammock, it also doubles as a high-strength accessory carabiner.

Includes two pieces per pack!

ACCESSORY CARABINER SET

(TMBINERo3)

Size	4 × 2.5 cm
Material	A6061
Weight	3 g/pc
Closed 	30 kg

The perfect clips for securing smaller items like water bottles, knives, or flashlights to your Ticket to the Moon bag. These versatile carabiners also work great as key rings and can be used to manage guy lines and more.

One set contains 8 pieces.

WATER RESISTANT LINE

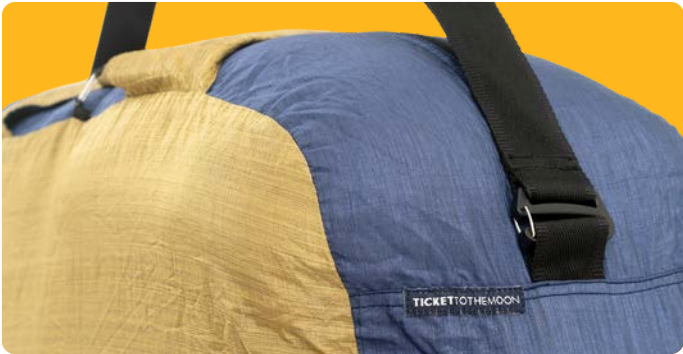

We've listened to the feedback and needs of our customers and are excited to introduce our Water-Resistant Line. In response to their requests, we've created products that offer enhanced protection against the elements. Our Backpack, Zipper Bag, and Sling Bags are now made from 75D Nylon water-resistant fabric with 2000mm watercolumn PU coating. All come with upcycled parachute Nylon lining from the Hammock left over material.

This innovative approach allows us to maintain the high quality you know and love, while offering improved durability and water resistance. Whether you're caught in the rain or out in unpredictable weather, our new collection ensures your essentials stay dry, all while staying true to our commitment to sustainability.

MOON CARRIER

(TMDF40L)

When you need more space. Perfect for transporting bulkier items like sports gear, the Moon Carrier is a true space-saver. The bottom is made from leftover tarp materials from production, making it water-resistant and ready to tackle any weather conditions.

After use, it easily folds down to a minimal size, just like all of our products. The carry straps can be conveniently secured with carabiners when traveling, keeping them out of the way. Practical, spacious, and compact — the perfect solution for those on the go.

ECO BAGS

SMALL

Size	30 × 32 × 6 cm
Weight	50 g
Capacity	10 l
Carrying capacity	15 kg

This practical companion in a compact handbag format is always by your side — perfect for keeping smaller accessories safe and easily accessible.

MEDIUM

Size	34 × 39 × 6 cm
Weight	65 g
Capacity	15 l
Carrying capacity	15 kg

This dynamic blend of storage capacity, durability, and portability brings a new level of convenience to your everyday life. Whether you're carrying groceries or packing the essentials for a day by the lake — it's a true delight to take along.

LARGE

Size	46 × 48 × 6 cm
Weight	80 g
Capacity	30 l
Carrying capacity	15 kg

This bag can handle just about anything — even heavier items. Its spacious interior means you don't have to be selective about what you take with you. The wide handles rest comfortably on your shoulders without digging in.

- Flexible custom-designed hook fits onto almost any wall structure — or attaches easily to a carabiner
- Combination of mesh, waterproof, and leakproof pockets
- Organizer section for both classic and electric toothbrushes
- Detachable mirror
- Integrated towel holder
- Includes a detachable 50 g ultralight roll bag with 4 pockets — perfect for weekend trips
- Multiple elastic loops for small items

MOONDISCS

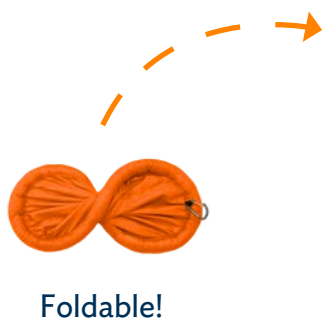

This travel and everyday-friendly toy is entirely handcrafted from leftover parachute fabric and comes in two sizes. The Ultimate Moon Disc is similar in size to a standard ultimate frisbee, while the smaller Pocket Moon Disc is more compact and easier for kids to throw.

It flies smoothly and reliably, making it perfect for casual games — without the risk of injuries or broken gear. Plus, it folds down super small, can't break or deform, and is ideal for travel. The rim is fully filled with fabric offcuts. Eco win!

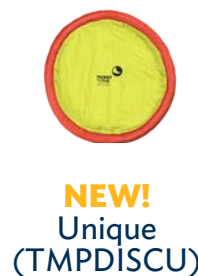

Our latest Moon Discs, created in collaboration with “Project Wings”, bring you high-quality, durable frisbees made with the support of local communities in Sumatra. This initiative strengthens community engagement and contributes to expanding our upcycled production — turning waste into purpose, together.

HOME & GARDEN LINE

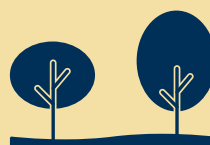

Discover the Home Hammock line — your new favorite addition to home comfort and style. Designed to elevate your space, these hammocks come with upgraded features for an even better lounging experience. Crafted from stronger material, they offer enhanced durability and support without sacrificing the soft comfort you love. Available in six natural color tones, there's a perfect match for every interior — whether you're styling your living room, terrace, or cozy reading nook.

The variety in colors makes them a perfect fit for outdoor spaces, allowing you to enjoy the sunshine while lounging in style in your garden. In addition to the upgraded material and color options, each hammock in the "Home Hammock" line is equipped with rope, carabiner, and sleeves for easy setup and use. This means that you won't have to worry about purchasing any additional equipment to enjoy your new hammock. Simply unpack it, set it up, and relax in comfort.

SLING BAG PREMIUM

(TMSLBPR)

Weight	138 g
Material	105D Crinkle Nylon
Strap length	55 cm - 100 cm

Smart, stylish, sustainable.

This foldable sling bag is made for everyday adventures. With four zipped pockets, a smart wallet-style interior, a hidden pocket, and a keychain carabiner that attaches in five spots, it keeps your essentials secure and organized.

The contrasting inner color makes it easy to find what you need, while partly upcycled materials reflect our eco-conscious approach. Wear it under clothing or as a hip bag — lightweight, washable, and ready to go.

- 4 zippered pockets
- Keychain carabiner attachable in 5 positions
- Hidden pocket for valuables
- Contrast-colored interior for better visibility
- Wallet-style layout for organized storage
- Dedicated smartphone/sunglass pocket
- Made with partly upcycled materials
- Hip bag use
- Can be worn as a hip bag or under clothing
- Machine washable at 30°C

BACKPACKS PREMIUM

Since launching our Home & Garden Hammock line, it's no surprise we've got some premium offcuts — and of course, we're putting them to good use.

This gives our Backpack range a fresh upgrade in color and style — all while keeping weight and pack size nearly the same.

MINI BACKPACK PREMIUM

(TMMBPR)

Size 28 × 42 × 13 cm
Weight 165 g
Capacity 15 l
Carrying capacity 15 kg

- Laptop/document compartment (13")

BALI IKAT COLLECTION

For years, Ticket to the Moon has been known for innovation, sustainability, and adventure-ready gear. Now, we take a bold step forward by blending our passion for functionality with the rich traditions of Bali.

Introducing the Ikat Collection — where modern design meets timeless craftsmanship. Inspired by the island's deep cultural roots, we've collaborated with skilled Balinese artisans to incorporate authentic ikat fabric into our signature upcycled nylon products.

Each piece in this collection is more than just a bag; it's a bridge between past and future. Ikat weaving is an ancient art form, with every thread carrying the stories, care, and dedication of the artisans behind it. By integrating this handcrafted fabric into durable, functional designs, we honor their craftsmanship while giving it new life in contemporary fashion.

Fabric source: Cap Cili, Bali, Indonesia

Every ikat pattern is carefully dyed and woven, infusing each piece with the cultural richness of Bali. More than just an accessory, each bag is a tribute to sustainability, tradition, and the harmony between timeless heritage and everyday resilience.

POINT OF SALE

Moon Display | Eco Bag Bowl |
Backpack Tree | Backpack Dispenser

Ticket to the Moon is present in **hundreds of locations worldwide** — from upscale French boutiques and extreme sports retailers to street pop-up shops, festivals, and events. Our distinctive displays capture attention and bring the brand to life.

Developed with input from our community, our point-of-sale (POS) materials and display solutions provide clear visual guidance on product use, while maintaining a small footprint and a handcrafted, natural finish — perfectly aligned with our sustainable and functional product range.

COMMUNITY

SOCIAL & ENVIRONMENTAL PROJECTS

Over the past years, we've been fortunate to witness real change. Together with our friends and partners in Sumba, we've significantly improved local living conditions. The progress has been so remarkable that the **TTTM Foundation's** direct involvement is now **gradually coming to an end**. We're proud of how the project has developed and continue to support our Sumbanese friends with advice when needed — while cheering them on from the sidelines.

With this chapter closing, we're shifting our focus to **new, meaningful social and environmental initiatives** that align with our values and vision of a better world. As an organization committed to sustainability and social responsibility, we believe in giving back and supporting those in need. We're currently in a phase of reorientation and actively seeking new projects and partners. If you know of an initiative that could benefit from our support — let us know!

In addition to various collaborations — including the donation of 200 sleeping bags to people experiencing homelessness in Austria (our second home), in partnership with Caritas — **our main partnerships include:**

SOLEMEN

One of our valued partners is the humanitarian project Solemen, a non-profit organization based in Bali, Indonesia. Solemen supports individuals living with **disabilities, chronic illnesses, and life-threatening conditions** — especially those who cannot afford medical care, rehabilitation, or basic necessities. They also raise awareness around key social and health issues through community campaigns and events.

Ticket to the Moon deeply appreciates the impactful work Solemen is doing and proudly supports their cause. As part of our collaboration, **we've donated printed eco-bags** made from eco-friendly, reusable materials. These bags feature both the Solemen and Ticket to the Moon logos, helping to raise awareness for Solemen's mission while promoting sustainable habits.

With this initiative, we encourage the use of reusable bags over single-use plastic. By supporting Solemen with eco-bags, we **help reduce plastic waste and contribute to income opportunities** — all while standing behind a cause we truly believe in.

Our team believes in giving back to society, and we are committed to supporting worthy causes.

One way we support Solemen is by **providing Moonchairs to disadvantaged families**, especially those with disabled children. These families, once isolated in a poor area of Denpasar, now live in the Renon district, in clean, accessible housing with wheelchair access, thanks to Solemen's collaboration with the Bali government.

The children benefit greatly from regular therapy, nutritious food, and emotional support. Previously, they had no opportunity to play. Now, they're **enjoying the freedom of swinging** and discovering new ways to have fun. **What a joy!**

PROJECT WINGS

Project Wings is a growing **German NGO** focused on addressing three critical global issues: species **extinction**, tropical **deforestation**, and plastic **pollution**.

They are currently building the **world's largest recycling village** in Indonesia, using 250 tons of plastic waste to create Ecobricks for affordable housing. This self-sustaining project, run by locals, combines environmental protection, nature conservation, and animal welfare.

In addition to protecting rainforests and promoting plastic alternatives, Project Wings is committed to education and advancing animal welfare.

Project Wings plans to build a sustainable marketplace, sports grounds, and an organic restaurant. Our latest **Moondiscs, created in collaboration** with Project Wings, are high-quality, durable frisbees made with the help of local communities in Sumatra. This initiative supports local engagement and furthers our commitment to upcycled production.

We will also **provide hammocks for community patrols** and sleeping cabins for the team and supporters. Currently, we're in the planning phase of the next steps to raise awareness in Sumatra.

One man's trash is another man's treasure!

QUALITY CONTROL

After the workstation inspections, every product is checked again before leaving the production

Quality is our third pillar (where it gets really detailed), alongside our **ethical practices** and **community approach**. To ensure the hammock flow, we start with the incoming materials. Upon arrival, samples of all security-relevant components are collected and taken to our testing room.

TESTING MACHINE

Product Testing Machine

Before entering production, all components undergo testing with our **tensile testing machine**, where measurement sensors record key parameters and save a protocol in our QC database.

For certain parts, like the S-hooks, we conduct continuous testing on every batch produced. We've also developed a **unique testing procedure for fabrics** to ensure their suitability for hammocks and consistent quality across every batch and color.

The sewing of our straps is carefully monitored, and we **thoroughly inspect** final products to guarantee that you receive **perfectly crafted items** made with love in Bali.
