

WORKBOOK

FALL / WINTER 2026

ALTITUDE LO

VES NATURE

DESIGNED IN GERMANY. MADE IN EUROPE.

Facing the challenges of today's globalized world, Altitude has made the deliberate decision to keep all production in European Union countries. This strengthens regional economies and rewards reliable suppliers and ethical production policies and it also shortens delivery times. Thus, by conforming to all EU legislation regarding fair working conditions, Altitude reinforces its holistic approach and encourages the responsible manufacturing of outdoor gear of the highest possible quality.

NATURE PROVIDES.

Humans are smart, but nature is smarter - this is why ALTITUDE has opted for Merino wool, nature's wonder fiber and one that has evolved and improved over thousands of years. One of the best-performing natural fibers in the world, Merino wool can breathe and creates a cozy micro-climate above your skin which always keeps you warm and dry.

It is hypoallergenic, safe for sensitive skin and has a UVP factor higher than any other fabric. It is naturally flame-resistant and ten times more durable than cotton or silk. Only healthy animals produce the high quality wool we desire. Our wool comes from certified mulesing free farms where animals are treated with respect.

Characteristics: odor and water repellent | fast-drying | keeps you warm when wet | incredibly colorfast | flame resistant and self-extinguishing | biodegradable, sustainable and renewable.

WHY CHOOSE ALTITUDE?

- DESIGNED IN GERMANY
- MADE IN EUROPE
- MULESING FREE WOOL
- SUPERIOR QUALITY ITALIAN YARNS
- EVERLASTING CARRY OVER STYLES
- EASY TO SETUP POS SYSTEM
- STOCK PROGRAM OF CORE SELECTION
- REORDER IN B2B SHOP [ALTITUDE.EU](https://altitude.eu)

YARNS MADE IN ITALY OUR YARN SUPPLIERS

Filivivi

Since the founding of ALTITUDE we have chosen to work with the yarns of Filivivi's brands Lanerossi Filati (lambswool) and Folco (merino wool), because they reflect our own expectations when it comes to responsible and high-quality production of textiles within Europe.

The core values of their philosophy include high-quality raw materials, sustainability, experienced in-house production and manufacturing with the utmost care. The intense color palettes make Filivivi's products instantly recognizable and are perfectly suited for what we like to offer.

LAMBSWOOL BLEND

Lanerossi Filati

Composition:

80% virgin lambswool
20% polyamide

Lambswool fibers are shorter than those of other wool, which makes the fibers softer. The combination of Italian virgin lambswool with recycled polyamide creates a yarn that is ideal for the production of beanies and other wool accessories as it prevents wearing out and makes the yarn more robust. In addition we have a very large selection of colors for our lambswool/polyamide blend (80/20) and can therefore offer a wide selection of color variations.

100% MERINO WOOL

Lanerossi Filati

Composition:

100% virgin wool(merino)

One of the best-performing natural fibers in the world, Merino wool can breathe and creates a cozy micro-climate above your skin which always keeps you warm and dry. It is hypoallergenic and safe for sensitive skin. With its naturally insulating, moisture wicking and antibacterial properties Merino wool is an exceptional choice for performance fabrics. Our Merino wool comes from certified mulesing free farms where animals are treated with respect.

50/50 MERINO BLEND

Folco

Composition:

50% virgin wool (merino)
50% acrylic (dralon)

Dralon produced by Dralon GmbH is unrivaled on the market as a dry-spun acrylic fiber. Because Dralon Acrylic is a dry-spun fiber, almost no water is used in the production process, compared to cotton or wool. The combination of Merino wool with Dralon Acrylic creates a soft and robust yarn with exceptional functional properties such as quick drying and moisture wicking.

CERTIFICATES

Global Recycled Standard GRS (ICA-GRS-21-100/01A) / OEKO-TEX® STANDARD 100 (084222.0)

ALPACA YARNS SPUN IN ITALY

Pecci Filati

For our super soft and lush Alpaca yarns we have chosen to work with the yarns of Pecci Filati because when it comes to the responsible and high-quality production of Alpaca wool within Europe, there is no better supplier.

Pecci Filati has been designing and manufacturing yarns with high-quality natural materials since 1884. They produce all yarns in-house and the only thing that is outsourced is the wet dyeing process.

We trust in their commitment to responsible and sustainable production in the yarns we use.

ALPACA MERINO BLEND

Pecci Filati

Composition:

68% virgin wool (alpaca)

22% nylon

10% virgin wool (merino)

Alpaca has many similarities to sheep's wool, but is significantly softer and warmer. Alpaca wool is also silkier and contains no lanolin which makes it a hypoallergenic fiber. It is prized for creating ultra soft and luxurious yarns. By combining Alpaca and Merino wool we are merging the best properties of both fibers, creating a wonderfully soft yarn which is super warm, safe for sensitive skin and ultra light weight.

CERTIFICATES

Global Recycled Standard GRS (ICA-GRS-19-970/01A) / Responsible Wool Standard RWS (ICA-RAF-21-1734/01A)

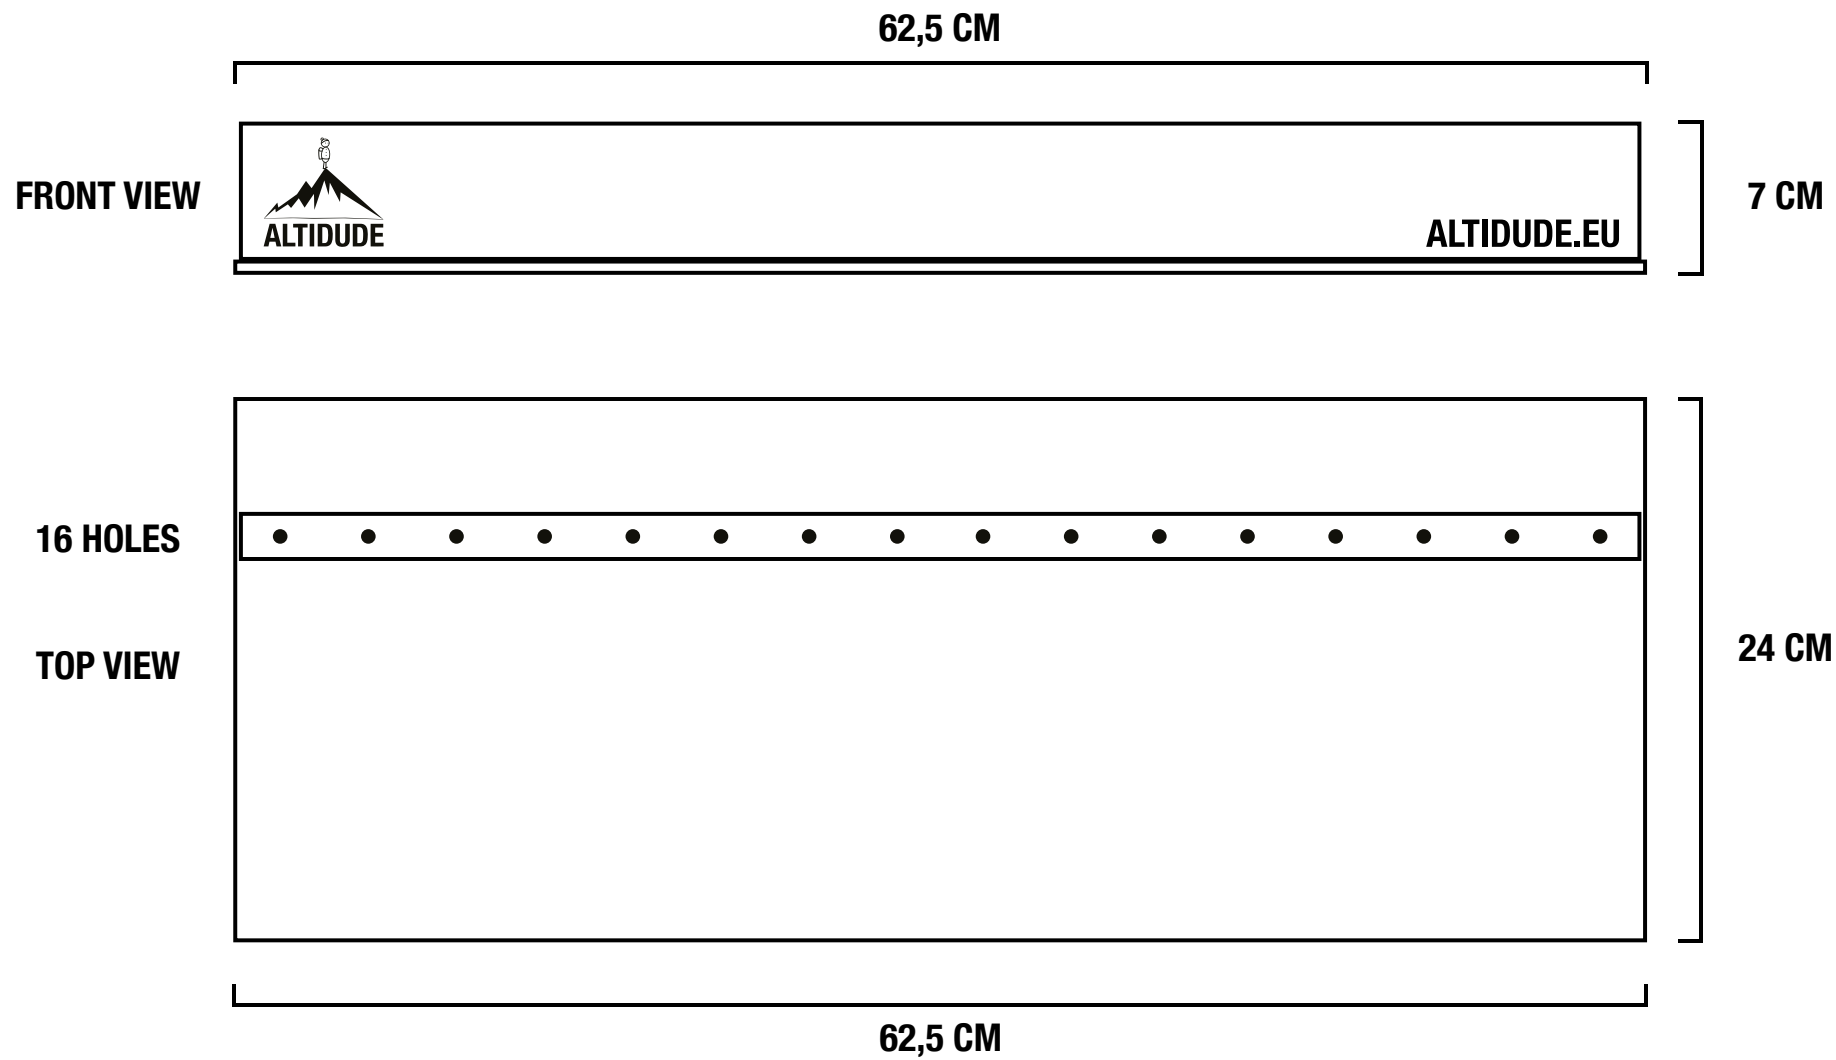

MODULAR POS

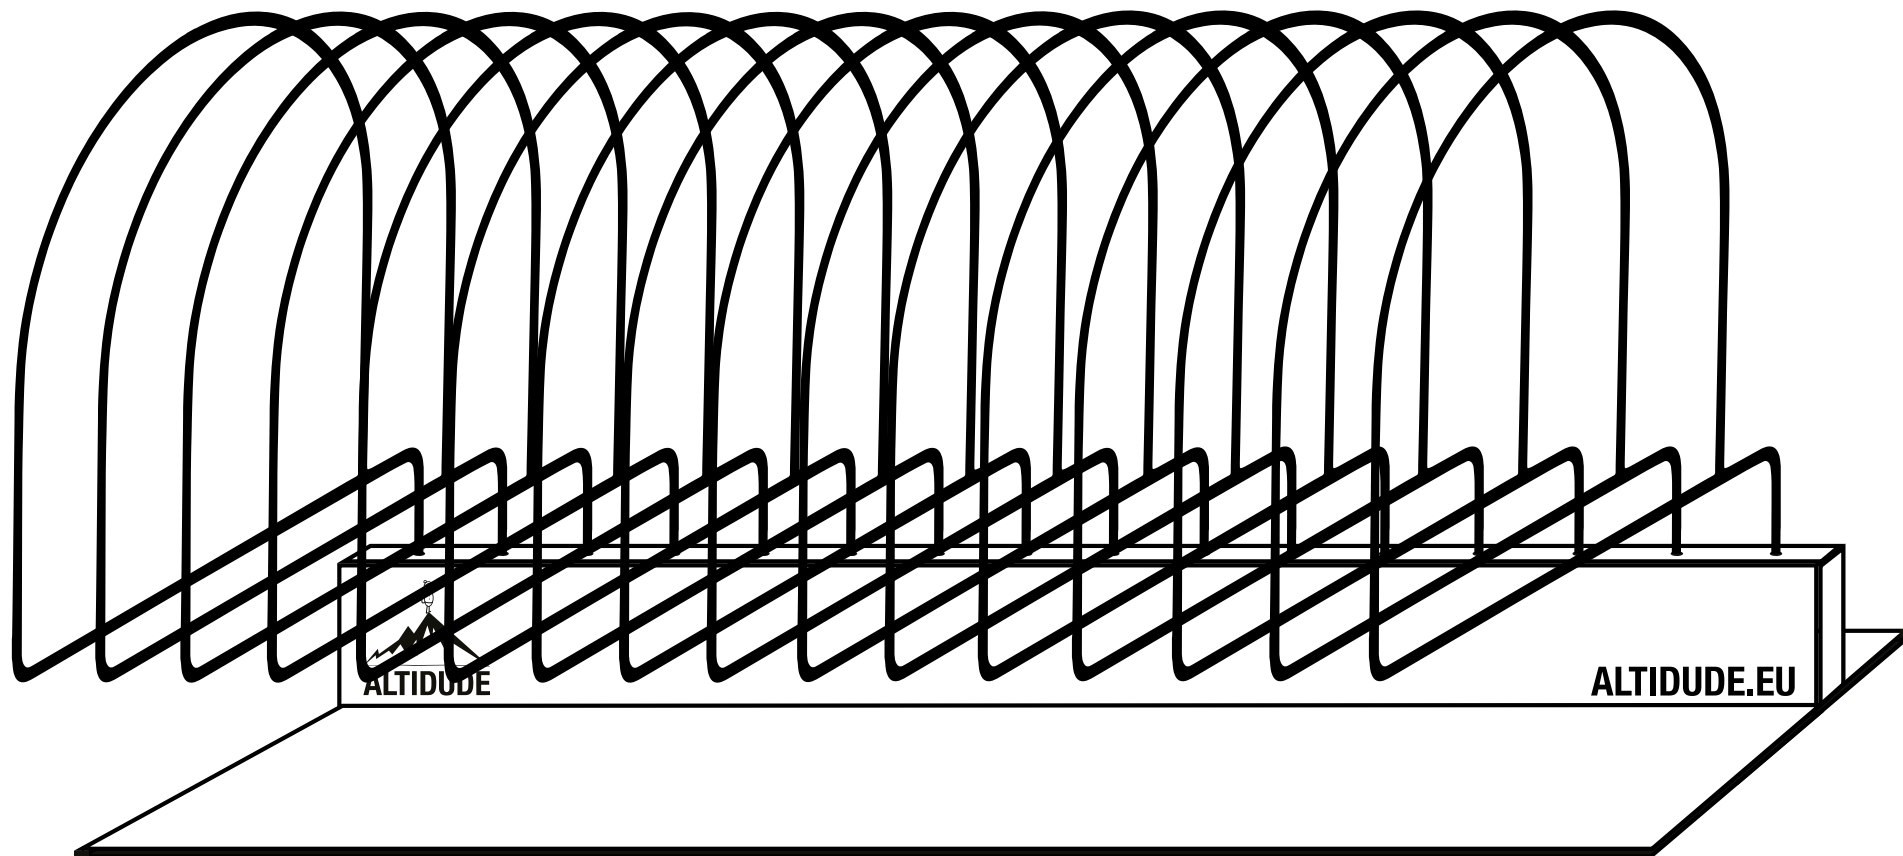

Our modular and versatile wood and acrylic POS systems come in different sizes and shapes. They can be adapted to fit any store environment. From small to large, countertop or wall display, anything is possible. Need a custom solution? Give us a call!

- Square 62.5cm (16 slots)
Mountable on wall rack or standalone
- Half-circle countertop (9 slots)
