Re:connect

WORKBOOK

2027

2027 — LET'S RECONNECT WITH OUR WILD NATURE!

The world is moving faster than ever. In this era of rapid change and information overload, the challenge of finding true rest and balance is real and should be addressed. We are collectively moving away from the relentless pursuit of performance and towards a deep need for regeneration. This movement is driven by a shared, vital desire for connection — with nature, with people, and with ourselves. This profound cultural shift is why we have chosen the motto for this workbook: "Re:connect." We see people moving from impulsive consumerism to intentional ritual, seeking products that carry genuine meaning. The market's "eco-hype" is giving way to a grounded movement we think of as "Sustainable Simplicity" — sustainability

practiced with humility, not moral pressure. Above all, authenticity beats perfection as we seek real materials, real places, and real connections to anchor us. Your journey to reconnect with your wild nature, your inner self, and your inner child is a timely and powerful one. This is where Ticket To The Moon (TTM) steps in. Our mission is to be your steadfast companion on this path, making the seemingly hard things less heavy and the beautiful moments even more light-headed.

2027 — LET'S RECONNECT WITH OUR WILD NATURE!

We fulfill this mission by ensuring every product is a ticket to a moment of peace. We are committed to using human-friendly materials and connecting people to people through fair values and craftsmanship. Our dedication to the planet is a continuous journey, reflected in our ambitious goals: Aiming for a total share of 60% recycled fabrics and 100% recycled aluminum in our products, all while continuously reviewing and improving our CO2 footprint by initiatives like the extension of our photovoltaics system to currently 80% of the total capacity and the start to our electric fleet for deliveries in our home in Bali.

We will keep creating products designed to aid your personal quest for balance and self-determination. This workbook is a gentle invitation to pause, look inward, and embrace this year full of transformative opportunities.

Stay wild, moon child!

WHATS NEW 2027

Our product range of life and travel companions just keeps growing- more colorful than ever before. Our 30th year in action proved to be one of the most successful ones so far. Our highlights include opening a 600 m2 store in Bali, processing

and learning tremendously from the ISO 9001 certification, hiring numerous young professionals to support our tribe, expanding our foundation projects and last but not least being able to share our happiness with you via these newcomers:

Hey kids and free spirits, listen up! Hammocking just got way more fun and accessible. With two new hammock sets in different sizes that shine in the colors of a rainbow we are ready for fun and adventures ahead!

Say hello to our new all-in-one insulated sleeping system that boasts all your favourite PRO hammock features!

Our 30kg accessory carabiners were reengineered and can now carry an incredible 100kg!!! Another highlight!

We are very excited about the slingbag range newcomers- 1 for "mini-me"s or minimalists, the other one for those appreciating extra space!

To all the mindfulness lovers: may you experience bliss with our new Yoga hammock, as well as when travelling with your yoga essentials in our Bali heritage-style bags.

Small but mighty! This foldable back cover might surprise you with its many uses, e.g. as a pop-up sitting mat when sitting on the wet ground alone or with a friend

We love that we want to share with you- for your keys inside your Slingbag, attaching gear when exploring, and all kinds of stuff that you want safe and always nearby.

FAIR PRODUCTION

Our long-term goal is to raise awareness of larger global challenges and fair production issues. In all our operations, we aim to bring advancement to the community while respecting and supporting the local social structures. **ACT LOCAL!** Most of our partners and materials originate from Indonesia — our beloved nest and home. Ticket to the Moon is not only a brand but also a factory! We have **300+ team members** working across **5,000 m²** of **production space** and are proudly crafting all products on the island of Bali. All upcycled items include a **'Made By'** label to create a more personal link between customer and maker.

At Ticket to the Moon, we're committed to offering products that are not only **innovative** and **high-performing** but also gentle on the environment. Our fabrics are entirely **PFC-free** and certified according to the **OEKO-TEX® Standard 100**. This means they have been tested for harmful substances and are proven to be safe in human ecological terms. This commitment ensures our products are **skin-friendly** and **safe for everyone** — including children and those with sensitive skin.

Join us in **reducing our impact on the planet**. With a commitment to local sourcing, resource-efficient production, and **innovative upcycling** methods, we offer durable, high-quality products with genuine ecological value. Experience the benefits of local value creation and thoughtful packaging design. Every leftover material finds new life in our **re.vived series** or is recycled into fresh nylon chips. Explore our sustainable practices and make a difference today.

We are committed to maintaining the highest standards of **sustainability and environmental responsibility in our production**. A portion of the materials used in our products is bluesign® certified, ensuring they meet stringent criteria for resource efficiency, consumer safety, and minimal environmental impact. Additionally, our entire product line is **OEKO-TEX® Standard 100 certified**, guaranteeing that every component is tested for harmful substances and meets globally recognized safety standards. To further strengthen our commitment to responsible manufacturing, we are in the process of **obtaining ISO 9001 certification**. These will enhance our quality management systems and reinforce our dedication to sustainable business practices.

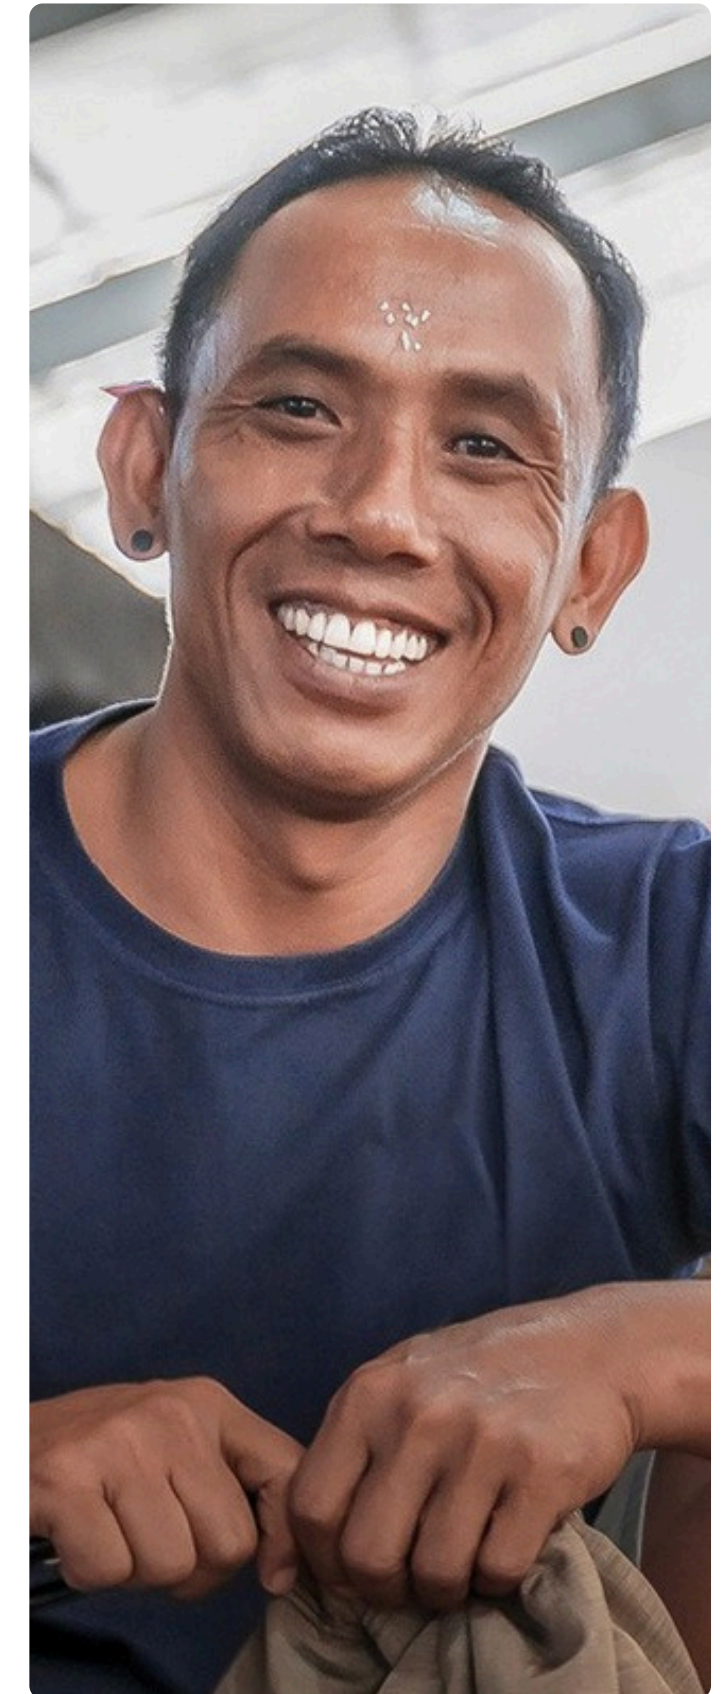

Since day one, we have defined ourselves not only as a manufacturer of feel-good products, but also as an advocate for socially responsible production conditions and **fair trade at all levels**. Together with the fair trade movement, we share the vision of more justice, transparency and sustainability in international trade (World Fair Trade Organization, 2009).

MEMBER

As a **recognized partner of the Austrian, South Tyrolean and German world shops**, we guarantee a number of criteria at every stage of the production process — including fair working conditions, fair trade practices, and environmental protection. We have been an **official WFTO member since 2023**. With honesty and mindfulness, we are heading full steam ahead towards our utopia — for our employees, for our suppliers and for our planet.

“We live and work in Bali, produced at our home”

HANDCRAFTED IN BALI WITH LOVE

CERTIFIED QUALITY MANAGEMENT

Ticket To The Moon (PT. Ayunan Bulan International) is proud to operate under an **ISO 9001:2015** certified Quality Management System, independently certified by **SGS**.

This certification reflects our commitment to consistent processes, continuous improvement, responsible production, and reliable quality — from product development and purchasing to production, quality control, and customer care.

For our customers and partners, it means that the way we work is regularly audited and verified against an internationally recognized quality management standard.

Quality is our third pillar (where it gets really detailed), alongside our **ethical practices** and **community approach**. To ensure the hammock flow, we start with the incoming materials. Upon arrival, samples of all security-relevant components are collected and taken to our testing room.

After the workstation inspections, every product is checked again before leaving the production.

TESTING MACHINE

Product Testing Machine

Before entering production, all components undergo testing with our **tensile testing machine**, where measurement sensors record key parameters and save a protocol in our QC database. For certain parts, like the S-hooks, we conduct continuous testing on every batch produced. We've also developed a **unique testing procedure for fabrics** to ensure their suitability for hammocks and consistent quality across every batch and color. The sewing of our straps is carefully monitored, and we **thoroughly inspect** final products to guarantee that you receive **perfectly crafted items** made with love in Bali.

JUNIOR HAMMOCK SET

(TMJR)

Which hammock is the right size for little humans? After many requests for an interim size between the Mini and the Compact Hammock, we decided to develop a set. But we also wanted to make it fun. Our lovely production crew came back with this adorable design. We are completely amazed and are sure that your family and friends will love it too.

- Multi purpose set (hammock, carabiners, ropes)
- Gear hammock, keeping your belongings off the ground
- Hammock for kids
- Fits under adult size hammock

Fabric length	300 cm
Width	140 cm
Breaking strength	>450 kg

Included:

Express Bag

6kN Carabiners

When going far — or if every gram counts — even a conventional travel hammock might be too heavy. Some simply love the idea of having a hammock that can truly go anywhere, anytime, without having to leave anything else behind. After years of searching for an even lighter fabric that still offers the safety and comfort Ticket to the Moon is known for, we're excited to introduce our Lightest Hammock. It's an ultralight setup made from a locally produced, recycled high-performance crinkle nylon textile. This award-winning packing wonder features a full-length hammock body (300 cm) and is perfectly suited for taller users — without compromising on comfort. It weighs only 220 grams — including the express setting bag. Equipped with 6kN mini-carabiners and special UHMWPE-rope, it literally fits into your pocket.

THERMO PRO HAMMOCK

(TMTPRO)

Let us welcome the newest family member of the PRO hammock series!

It boasts a meticulously sewn-in bottom insulation that contours naturally to the body, providing consistent warmth and comfort! Apart from that, it is designed with the same unique functionality as the Pro Hammocks.

Just bring this compact hammock and your favourite straps, and you are ready to sleep warm wherever, without an additional quilt or camping mattress!

ATTACHMENT KITS

Connect & Hang (Nicer)

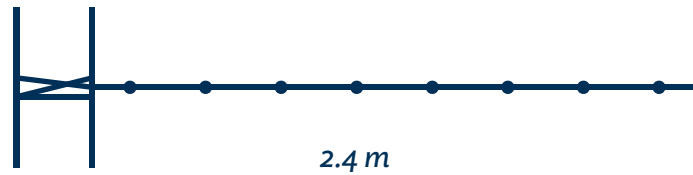

NAUTICAL ROPE KIT

Length	2.4 m
Diameter	Ø 5 mm
Weight	(preknotted)
Max. load	230 g
Material	100% Nylon
Breaking strength	>580 kg

An extremely durable, sturdy, and safe rope hanging system. This minimalist innovation — invented by Ticket to the Moon over 25 years ago — changed the hammock world forever. It allows anyone to hang a hammock within seconds, no knots needed. But if you want to, you can still add your own ;). (Two pieces per pouch!)

MOON STRAP

Length	2.7 m
Width	2 cm
Weight	216 g
Max. load	300 kg
Material	100% Polyester
Breaking strength	>760 kg

This daisy-chain webbing is ultra-strong, anti-slip, and incredibly easy to use. It's ideal for trees with sensitive bark or for hammocks shared by multiple people. (Two pieces per pouch!)

(TMROPE)

LIGHTEST STRAP

Full length	2.7 m
Tree-hugger	L: 1.2 m W: 2 cm
Rope	L: 1.5 m Ø 3 mm
Weight	95 g
Max. load	200 kg
Strap material	100% Polyester (PES)
Rope material	UHMWPE
Breaking strength	>400 kg

Weighing just 100 g, this tree-friendly and easy-to-use suspension system is perfect when every gram counts. Made from durable UHMWPE rope, it's built to last. It even fits into the express bag of our lightest hammock — and comes as a pair. (Two pieces per pouch!)

STRAP EXTENDER

Length	1.55 m
Width	2 cm
Weight	105 g
Max. load	300 kg
Material	100% Polyester
Breaking strength	>760 kg

Ever been just 10 cm short of reaching the perfect hammock hang? Sometimes trees are thicker or farther apart than expected — and that's where the Strap Extender comes in. This pair of durable polyester straps makes it easy to extend or upgrade your Lightest Straps, Moon Straps, or classic Ropes. (Two pieces per pouch!)

(TMTFSE)

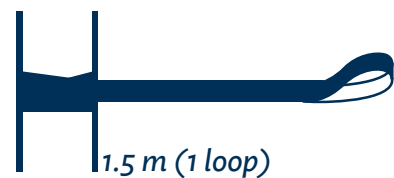

STRAP EXTENDER PLUS

(TMTFSEP)

Full length 1.5 m
Weight 240 g
Max. load 350 kg
Strap material 100% Polyester
Breaking strength >900 kg

You want to be absolutely sure that the trees are only hugged and not hurt when installing your hammock? The Strap Extender Plus is optimised for permanent setups, for trees with sensitive bark, and for anyone who wants to give trees some extra care. They are compatible with all standard attachment systems. (Two pieces per pouch!)

HANGING KIT

(TMWALL)

Back from your travels? Why not set up your hammock in the living room? It's the perfect spot to read a book, plan your next adventure, or simply unwind and relax. Suitable for use on concrete, brick, and wood surfaces.

Max. load 200 kg
Material Stainless Steel
Weight 155 g

- Set of 2 hangers
- Includes 2 screws, washers, and wall plugs
- Packaging designed for slat-wall display

2ND TREE KIT

(TM2NDTREE)

Dear bike-packers and cycling enthusiasts! This brand-new innovation might entirely change your next trip! All you need to get horizontal in your favorite travel hammock is a single tree or anchor point, your bike and the TTTM 2ND TREE.

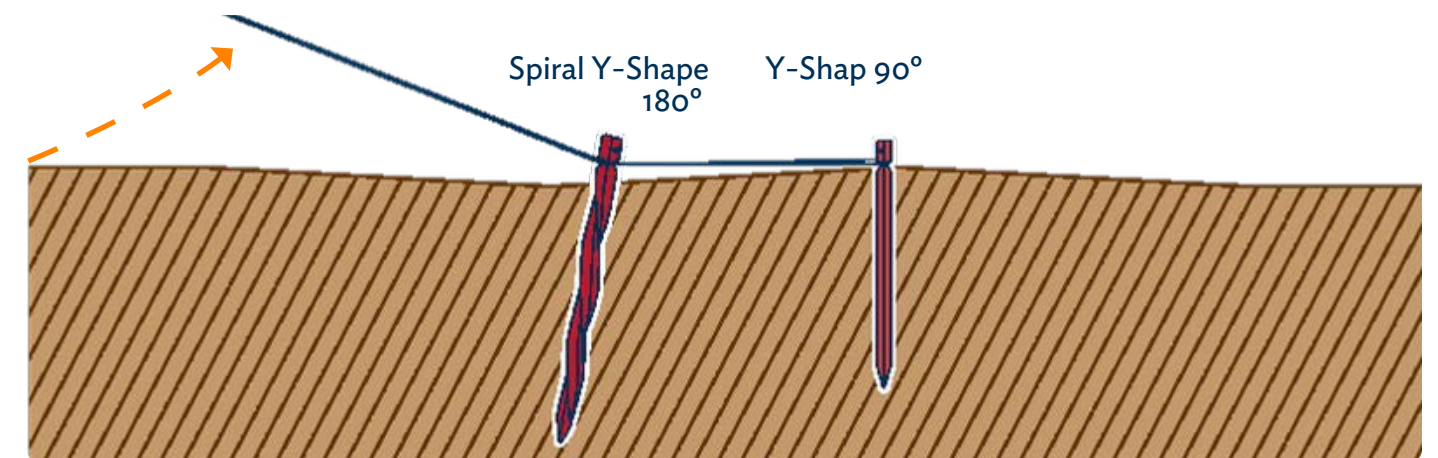

In almost no time, the pegs are safely placed in the ground, serving as an anchor. They are then attached to the bike in a stable triangle shape that will keep your setup stable and safe. Enjoy the flexibility and get the most out of your adventures!

- 2x UHMWPE Whoopie Slings 2,3 m
- 3x 25 cm spiral Y-shaped pegs AL7075
- 3x 18 cm Y-shaped pegs aluminium
- 4x UHMWPE Loops 30 cm
- Max. Weight 160 g
- Min. Weight 98 g (2 pegs + 1 Whoopie Sling + loops)

2ND TREE can be used with a weak tree, your trekking poles, any wooden pole or even with a motorbike too!

Make sure you do a proper set up position!

CARABINER 10 KN

(TMBINER10)

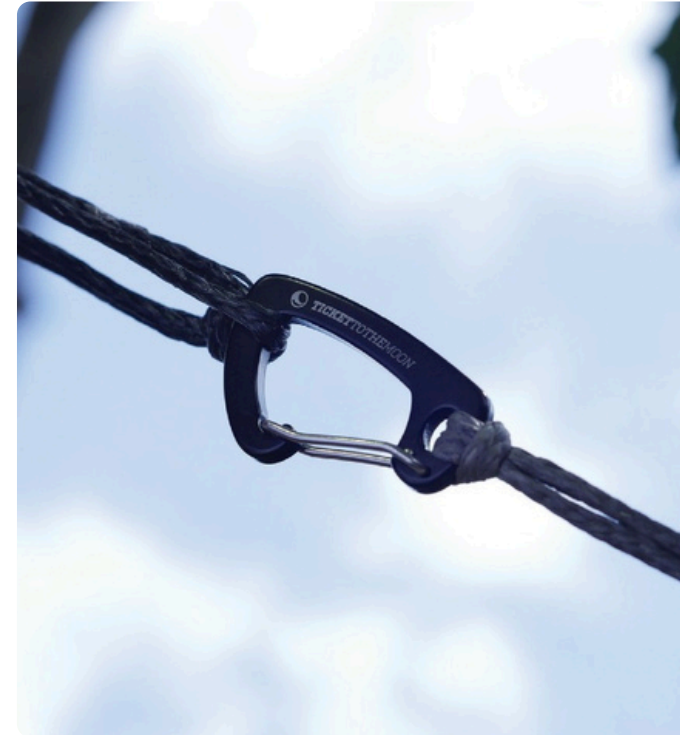

Size	6 × 3.9 cm
Material	A7075 T6
Weight	14.5 g/pc
Closed 	10kN
Opened 	3.5kN

If you like attaching gear to your hammock — or want extra safety for your joyfully playing children — consider upgrading to our weight-rated carabiners. Recently redesigned for even better security and reduced weight, they offer both peace of mind and added convenience when setting up your hammock.

Includes two pieces per pack!

CARABINER SET 6 KN

(TMBINER06)

Size	4.5 × 2.6 cm
Material	A7075 T6
Weight	6 g/pc
Closed 	6kN
Opened 	1.5kN

We designed this carabiner to be our most light-weight option — without compromising strength. With a closed gate rating of 600 kg, it's strong enough for any situation. The custom eyelet is perfectly suited for ropes like our UHMWPE lines. Ideal for the Lightest Hammock, it also doubles as a high-strength accessory carabiner.

Includes two pieces per pack!

CARABINER SET 22 KN

(TMBINER22)

Size	8.5 × 5.2 cm
Material	A7075 T6
Weight	34.4 g/pc
Closed 	22kN
Opened 	7kN

If you're looking for an extra level of safety, this carabiner is the perfect choice. Its added strength lets you easily open the gate — even while two dreamers are relaxing in the hammock.

Includes two pieces per pack!

ACCESSORY CARABINER SET

(TMBINER107)

Size	4 × 2.5 cm
Material	recycled A6061
Weight	3 g/pc
Closed 	100 kg

The perfect clips for securing smaller items like water bottles, knives, or flashlights to your Ticket to the Moon bag. These versatile carabiners also work great as key rings and can be used to manage guy lines and more.

One set contains 8 pieces.

UV SLEEVE

(TMHSUV)

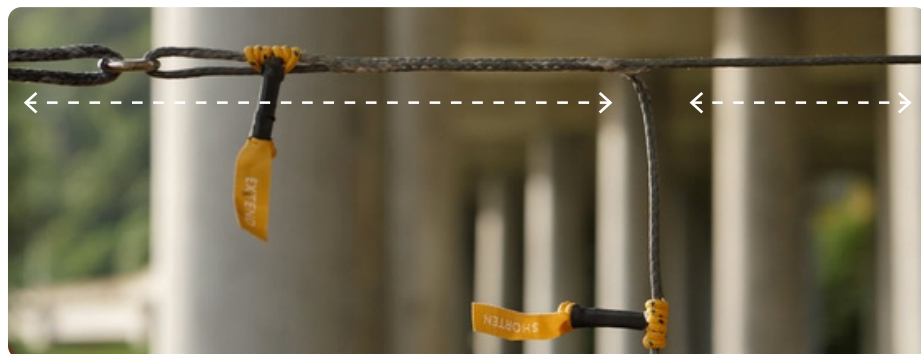

Protects your hammock like a second skin from dirt, sun and wind. An essential, but optional accessory if you plan to leave it in UV light for an extended time. It keeps your hammock clean and stops the wind from flapping it around when not in use.

RIDGELINE SET BASIC

(TMRIDGEB)

Material	PU Coated 3 mm UHMWPE rope
Weight	70 g
Length	220 - 320 cm
Max. Load	200 kg
Breaking strength	450 kg

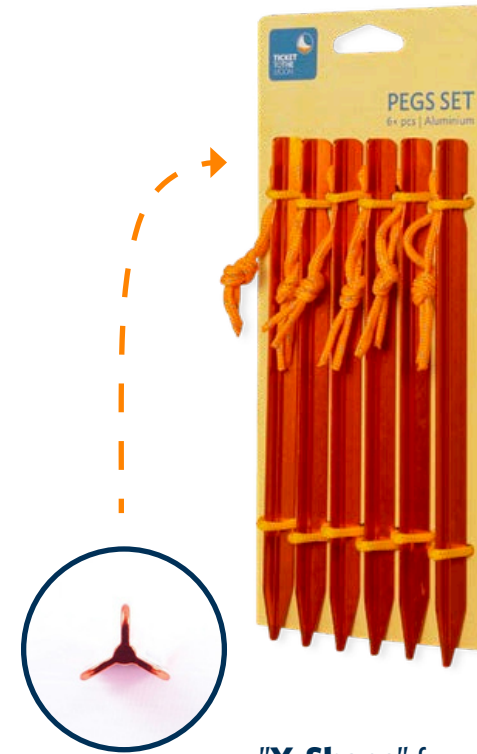

With this structural and adjustable ridgeline kit, you will certainly hang like a pro and find your perfect position-everywhere and always! Installation is super easy, and you will sleep much better! A clever fusion of state of the art materials and locked Brummel eye splice loop and whoopie sling technology make this accessory attractive for everyday use. It can be attached to the hammock using a girth hitch (like you attach the hook). The length is set by simply holding and pulling on the handles as indicated.

- UHMPE adjustable ridgeline 220 - 320 cm
- Organizer (6 compartments)
- Stainless-steel ring
- White mesh pocket (light diffuser)

PEGS SET

(TMPEG6Y)

"Y-Shape" for extra strength!

Length	18 cm
Width	12 mm
Weight	12.8 g
Material	Aluminium

These lightweight Y-shaped pegs are designed to provide a secure hold in a wide range of outdoor conditions. Their special shape increases surface area for better grip in the ground and offers strong resistance against pulling out. Made from durable aluminium, they are built to handle everything from tarp and tent setups to more demanding backcountry use. At only 12.8 grams per peg, they keep your gear light while remaining reliable and versatile for a wide range of outdoor adventures.

- Y-shaped design
- Durable construction
- Lightweight and portable
- Multi-purpose use

WHOOPIE SLING

(TMWHOOPE)

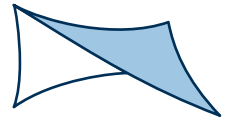

Length	35 - 200 cm
Width	3 mm
Weight	55 g
Material	Ø 3 mm UHMWPE rope
Max. Load	200 kg
Breaking strength	500 kg

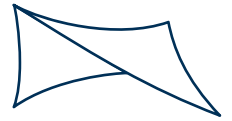

Upgrade your outdoor relaxation setup with the Whoopie Sling, the ultimate adjustable extension for effortless, secure hammock hanging. Engineered for versatility and strength, this lightweight rope system features a fully adjustable loop mechanism that lets you fine-tune tension and length without tying a single knot.

MOON TARP

(TMTARPO5A)

Easily packable!

Material	PU — Coated recycled Ripstop Polyester
Min. Weight	(2000 mm water column)
Max. Weight	775 g (4× guy ropes)
Size	845 g (8× guy ropes, 2× pegs)
Diagonal	250 × 250 cm
Guy rope: Blue	350 cm
Yellow	2 × 2.5 m
Orange	4 × 2 m
	2 × 1 m (Incl. 8 carabiners & 8 quick-release-tension-buckles, 2 × pegs)

This diamond-shaped tarp can be used with standard hammocks or on its own as instant protection from the elements. Reinforced, seam-sealed ridgeline, corners and tie-out points make it highly durable and adaptable. Blue-colored ridgeline tie-outs with carabiners ensure easy orientation and quick setup. Four additional eyelets allow for various setup modes using extra cordage or poles. The adjustable guy lines are stored in convenient, breathable corner pockets for safekeeping.

- Waterproof (2000 mm)
- Fits all TTTM hammocks — except Honeymoon and Mammock
- Shields from rain, sun and wind
- Quick-release buckles for easy setup
- Compact and lightweight
- Comes in a Moon Pouch + with waterproof roll-top bag for safe transportation
- Contrast-colored ridgeline with carabiners for easy setup
- Mesh pockets for storing all guy lines

FULLMOON TARP

(TMFMTPARPA)

Material	P20D Recycled Ripstop Sil-Nylon
	1500 mm water column)
Min. Weight	585 g
Max. Weight	750 g (incl. 16× guy ropes, 6× pegs)
Size	320 × 280 cm
Diagonal	424 cm
Guy rope: Blue	2 × 2.5 m
Yellow	8 × 1.5 + 2 × 0.35 m
Orange	4 × 1 m (Incl. carabiners & quick-release-tension-buckles)

Easily packable in its roll top bag

The Fullmoon Tarp is an advanced all-weather shelter that can be set up in a variety of configurations. Whether as an A-frame, tent-like cover in challenging weather, or as a diamond tarp offering maximum airflow and visibility in milder conditions — we've got you covered. Thanks to its durable, high-grade 20D Sil-Nylon fabric, this tarp is not only fully waterproof and lightweight, but also impressively quiet, even in heavy rain. Ridgeline and extra tie-out points are already seam-sealed. No need for you to worry about it.

- Waterproof (1500 mm)
- Fits all TTTM hammocks — except Honeymoon and Mammock
- Protection from rain, sun and wind
- 16 Quick-release buckles for easy set-up
- Compact and lightweight
- Comes in a Moon Pouch + with waterproof roll-top bag for safe transportation
- Contrast-colored ridgeline with carabiners for easy setup
- Mesh pockets for storing all guy lines

LIGHTEST TARP

(TMLTPARPA)

Easily packable!

Material	20D Recycled Ripstop Sil-Nylon
	(1500 mm water column)
Min. Weight	395 g (4× guy ropes)
Max. Weight	470 g (8× guy ropes, 2× pegs)
Size	250 × 250 cm
Diagonal	350 cm
Guy rope: Blue	2 × 2.5 m
Yellow	4 × 2 m
Orange	2 × 1 m (Incl. 8 carabiners & quick-release-tension-buckles 2 ×)

Fast protection from rain, sun, and wind — while keeping weight to a minimum! Install it high for maximum shade and airflow, or low to keep rain and wind at bay. Reinforced sides, corners, and tie-out points make this minimalist piece of gear impressively sturdy. The 20D Sil-Nylon material allows the Lightest Tarp to offer full functionality. It features quick-release tension buckles on all four corners, two pegs, and four additional tie-out loops. The blue-colored ridgeline tie-outs with carabiners ensure easy orientation and fast installation. Ridgeline and extra tie-out points are already seam-sealed.

- Waterproof 1500 mm
- Fits all TTTM hammocks — except Honeymoon and Mammock
- Shields from rain, sun and wind
- 8 Quick-release buckles for easy set-up
- Compact and lightweight
- Comes in a Moon Pouch + with waterproof roll-top bag for safe transportation
- Contrast-colored ridgeline for easy setup with carabiners
- Mesh pockets for storing all guy lines

UNIVERSAL BUG NET 360°

(TMNET)

Black (TMNET07)

Green (TMNET24)

- Double zipper opens entire top
- Includes adjustable (non-structural) ridgeline
- 360° protection
- Extra fine mesh (200 holes/cm²)
- Washable at 30°C
- Mildew resistant
- Compact and lightweight

Would you like full protection and great functionality with minimal weight? This versatile 485 g bug net ensures you won't get bitten from below, thanks to its smart 360° setup. It's compatible with standard hammocks (without spreader bars) and fits all of our 3-meter-long hammock models. The soft yet durable polyester mesh keeps out even the tiniest insects, snakes, rodents, and other critters. The fully convertible top opens quickly with double circular zippers — offering extra freedom of movement or increased airflow when needed. Stuff a shirt into the soft pouch to turn it into a pillow. For stargazers, we recommend the black net.

Material	Polyester
Netting	200 mesh openings/cm ²
Weight	485 g
Size	300 × 130 cm

MOONQUILT ALLROUND

Outer material	Recycled -Crinkle Nylon 20D 44 g/m ²
Inner material	Upcycled Crinkle Nylon 70D 64 g/m ² (from hammock fabrics)
Weight	1280 g (1120 g quilt + 100 g hood + 60 g storage bag)
Size	200 × 140 cm
Filling	115 g/m ² 100% RPET Insulation ECODOWN by Thermore®
Moonquilt Temp. Range	limit comfy 3 5 20 °C

The Allround is the successor to our original Moonquilt — and its name says it all. More than just one of the best underquilts on the market, it offers impressive versatility. In windy conditions, you can zip up the recycled synthetic three-season underquilt, allowing it to fully envelop you and your hammock. Dual zippers and adjustable elastic shock cords let you easily regulate insulation from inside your hammock. Small corner pockets keep cords and mini carabiners neatly stowed when you're using it as a sleeping bag or blanket.

- Detachable hood, Machine washable at 30°C
- Mildew-resistant & water-repellent
- Can be used as underquilt or blanket (all in one solution)
- Also works as a sleeping bag (even around the hammock)
- Includes a storage bag made from upcycled mosquito netting

(TMMQA51)

MOONQUILT COMPACT

Outer material	Recycled -Crinkle Nylon 20D 44 g/m ²
Inner material	Upcycled Crinkle Nylon 70D 64 g/m ² (from hammock fabrics)
Weight	845 g (790 g quilt + 55 g bag + 60 g storage bag)
Size	210 × 135 cm
Filling	115 g/m ² 100% RPET Insulation ECODOWN by Thermore®
Moonquilt Temp. Range	limit comfy 3 5 20 °C

The Moonquilt Compact is a minimalist yet comfortable, ready-to-use three-season underquilt. Made primarily from recycled materials, it pairs perfectly with standard hammocks and our Moon-blankets.

- Machine washable at 30°C
- Mildew-resistant & water-repellent
- Can be used as underquilt or blanket (all in one solution)
- Includes a storage bag made from upcycled mosquito netting

MOONQUILT PRO 650

Outer material	20D Crinkle Nylon Downproof
Inner material	20D Crinkle Nylon Downproof
Weight	740 g (695 g quilt + 45 g bag + 60 g storage bag)
Size	210 × 135 cm (115 cm in the middle)
Filling	NHD® certified in RDS® (650 fill power; 280 g down)
Moonquilt Temp. Range	limit comfy -2 2 20 °C

- Ethically sourced, high-performance duck down
- Compatible with standard hammocks
- Lightweight and compact
- Water-resistant: retains insulation and breathability even when damp
- Exceed 10.000 minutes on the industry IDFB 18A Shake Test — equal to 7 days of continuous water exposure
- Includes a storage bag made from upcycled mosquito netting

MOONBLANKET COMPACT

(TMBCOM51)

Our Topquilt range is designed for adventure, with or without your hammock. A cosy companion to your Moonquilt and a practical addition to any outdoor setup. Built to keep you warm wherever you roam, these Topquilts are not limited to hammock life. From camping trips to travel days and everything in between, they're made to come along — even when your hammock doesn't.

Outer material	70D Crinkle Nylon (upcycled material from hammock fabrics)
Inner material	20D Crinkle Nylon 810 g (755 g blanket + 55 g bag)
Weight	
Size	205 × 135 cm

MOON CARRIER

(TMDF4oLN)

When you need more space. Perfect for transporting bulkier items like sports gear, the Moon Carrier is a true space-saver. The bottom is made from leftover tarp materials from production, making it water-resistant and ready to tackle any weather conditions.

After use, it easily folds down to a minimal size, just like all of our products. The carry straps can be conveniently secured with carabiners when travelling, keeping them out of the way. Practical, spacious, and compact — the perfect solution for those on the go.

MOONDISC

This travel and everyday-friendly toy is entirely handcrafted from leftover parachute fabric and comes in two sizes. The Ultimate Moon Disc is similar in size to a standard ultimate frisbee, while the smaller Pocket Moon Disc is more compact and easier for kids to throw.

It flies smoothly and reliably, making it perfect for casual games — without the risk of injuries or broken gear. Plus, it folds down super small, can't break or deform, and is ideal for travel. The rim is fully filled with fabric offcuts or processed and cleaned trash from our foundation projects. Eco win!

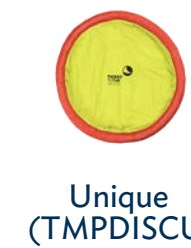

Our latest Moon Discs, created in collaboration with “Project Wings”, bring you high-quality, durable frisbees made with the support of local communities in Sumatra. This initiative strengthens community engagement and helps expand our re.vived series—turning waste into purpose, together.

YOGA HAMMOCK

(TMYHP)

Some 20 years ago, we manufactured the first patented yoga hammocks together for Gravotonics, a US and Bali-based company that delivered aerial yoga swings and hammocks to some of the most popular studios around the world. Some time ago, Gravotonics joined the TTTM group. Ever since, we have been redeveloping and reinventing the traditional yoga swing. It was designed to be strong, secure, and easy to set up and ideal for aerial yoga, acrobatics, or just relaxed floating. We added premium handles and a convenient adjustment system to fit most bodies, requirements, and situations.

General benefits of aerial yoga include improving flexibility, strengthening the core, and gently decompressing the spine for better posture and overall well-being. The floating sensation supports relaxation, relieves stress, and creates the ideal setting for mindful movement and meditation.

- High-grade parachute nylon
- Skin-friendly and breathable
- Fast-drying
- Mildew resistant
- Large Swing Seat
- Adjustable height and handles
- Foam padded handles

Foldable & easy to carry — in its own smart storage bag

MOONPAD

(TM—PADU)

Do you prefer a padded back when carrying your backpack? This foldable padding will reward you with a more comfortable feeling on your back, while it can serve you well in different ways- be it as your sitting mat when you and maybe also your friend want to be warmer, softer and dry, or when you use it as a foldable seat against your favorite tree, a pop-up rain cover, a laptop protection inside the backpack, a document pouch and so on.

- Back protector and sitting mat
- Available in 3 sizes
- Included pouch for documents
- Fast-drying
- Mildew resistant
- Fits 2 people when unfolded
- Lightweight

Plus

(TMPPADU)

Size 88,5 × 27,5 cm
Weight 110 g
Material 70D Crinkle Nylon
Compatible with Backpack Plus

Mini

(TMMPADU)

Size 84 × 26 cm
Weight 100 g
Material 70D Crinkle Nylon
Compatible with Mini Backpack

XS

(TMXSPADU)

Size 68 × 21 cm
Weight 66 g
Material 70D Crinkle Nylon
Compatible with: Backpack XS

RETRACABLE KEY CHAIN PRO

(TMZIP3)

Diameter Ø 3 cm
Max. Length 68 cm
Weight 12.95 g
Material Stainless Steel

If you want to make sure you never lose your keys and equipment again, you will love this gadget! Attach it to your Sling Bag, clothing, or backpack. We decided to develop a keychain with a slightly stronger pull, so it will even return larger key bundles and parts. Easy to attach via carabiner and ready to go!

HOME HAMMOCK 320

(TMHOME320)

PREMIUM

If you're looking for a true all-rounder — perfect for both solo use and couples — you'll love our 320 Hammocks. They combine the strength and versatility of parachute silk with a soft, cotton like touch for ultimate comfort. Thanks to the compact pouch, this hammock is also easy to take along on your travels — ideal when pack size matters more than weight.

HOME & GARDEN LINE

Discover the Home Hammock line — your new favorite addition to home comfort and style. Designed to elevate your space, these hammocks come with upgraded features for an even better lounging experience. Crafted from stronger material, they offer enhanced durability and support without sacrificing the soft comfort you love. Available in six natural color tones, there's a perfect match for every interior — whether you're styling your living room, terrace, or cozy reading nook.

The variety in colors makes them a perfect fit for outdoor spaces, allowing you to enjoy the sunshine while lounging in style in your garden. In addition to the upgraded material and color options, each hammock in the "Home Hammock" line is equipped with rope, carabiner, and sleeves for easy setup and use. This means that you won't have to worry about purchasing any additional equipment to enjoy your new hammock. Simply unpack it, set it up, and relax in comfort.

- Premium parachute nylon
- Packed in round compact pouch
- Includes 2x 10kN carabiners
- Includes 2x 140 cm pre-knotted ropes

Including Pouch & Sleeve

Included:

POINT OF SALE

Moon Display | Moon Bag Bowl | Backpack Dispenser

Ticket to the Moon is present in **hundreds of locations worldwide** — from upscale French boutiques and extreme sports retailers to street pop-up shops, festivals, and events. Our distinctive displays capture attention and bring the brand to life. Developed with input from our community, our point-of-sale (POS) materials and display solutions provide clear visual guidance on product use while maintaining a small footprint and a handcrafted, natural finish — perfectly aligned with our sustainable, functional product range.

COMMUNITY

SOCIAL & ENVIRONMENTAL PROJECTS

A JOURNEY WE SHARE

Everything we do — whether it is supporting a Safe House in Sumba, installing solar panels, investing in cleaner mobility, or shifting toward recycled materials — is connected by **one belief: that business should primarily create value beyond profit.**

The people around Ticket to the Moon have always been part of this journey. Our customers, partners, and supporters are not just buying products; they are helping shape the kind of company we become. That trust means a lot to us, and it motivates us to keep growing in the right direction.

We want to continue building a company that stands for freedom, adventure, fairness, and care — for people and for the planet. The TTTM Foundation is one important way of making that vision tangible. It allows us to support vulnerable communities, respond to real needs, and deepen the positive role we can play in the world.

Thank you for being part of this story. Every hammock you hang, every product you choose, and every bit of support you give helps us weave something bigger: a world that is a little fairer, a little greener, and a little more human.

SOCIAL & ENVIRONMENTAL PROJECTS

Over the past years, we've been fortunate to witness real change. Together with our friends and partners in Sumba, we've significantly improved local living conditions. The progress has been so remarkable that the **TTM Foundation's** direct involvement is now **gradually coming to an end**. We're proud of how the project has developed and continue to support our Sumbanese friends with advice when needed — while cheering them on from the sidelines.

With this chapter closing, we're shifting our focus to **new, meaningful social and environmental initiatives** that align with our values and vision of a better world. As an organisation committed to sustainability and social responsibility, we believe in giving back and supporting those in need. We're currently in a phase of reorientation and actively seeking new projects and partners. If you know of an initiative that could benefit from our support, let us know!

In addition to various collaborations—including the donation of 200 sleeping bags to people experiencing homelessness in Austria (our second home), in partnership with Caritas — **our main partnerships** include:

SOLEMEN

One of our valued partners is the humanitarian project Solemen, a non-profit organization based in Bali, Indonesia. Solemen supports individuals living with disabilities, chronic illnesses, and life-threatening conditions, especially those who cannot afford medical care, rehabilitation, or basic necessities. They also raise awareness around key social and health issues through community campaigns and events. Ticket to the Moon deeply appreciates the impactful work Solemen is doing and proudly supports their cause. As part of our collaboration, we've donated printed eco-bags made from eco-friendly, reusable materials. These bags feature both the Solemen and Ticket to the Moon logos, helping to raise awareness for Solemen's mission while promoting sustainable habits. With this initiative, we encourage the use of reusable bags over single-use plastic. By supporting Solemen with eco-bags, we help reduce plastic waste and contribute to income opportunities — all while standing behind a cause we truly believe in.

Our team believes in giving back to society and is committed to supporting worthy causes. One way we support Solemen is by **providing Moonchairs to disadvantaged families**, especially those with disabled children. These families, once isolated in a poor area of Denpasar, now live in the Renon district, in clean, accessible housing with wheelchair access, thanks to Solemen's collaboration with the Bali government. The children benefit greatly from regular therapy, nutritious food, and emotional support. Previously, they had no opportunity to play. Now, they're **enjoying the freedom of swinging** and discovering new ways to have fun. **What a joy!**

PROJECT WINGS

Project Wings is a growing **German NGO** focused on addressing three critical global issues: species **extinction**, tropical **deforestation**, and plastic **pollution**.

They are currently building the **world's largest recycling village** in Indonesia, using 250 tons of plastic waste to create Ecobricks for affordable housing. This self-sustaining project, run by locals, combines environmental protection, nature conservation, and animal welfare.

In addition to protecting rainforests and promoting plastic alternatives, Project Wings is committed to education and advancing animal welfare.

Project Wings plans to build a sustainable marketplace, sports grounds, and an organic restaurant. Our latest **Moondiscs, created in collaboration** with Project Wings, are high-quality, durable frisbees made with the help of local communities in Sumatra. This initiative supports local engagement and furthers our commitment to upcycled production.

We will also **provide hammocks for community patrols** and sleeping cabins for the team and supporters. Currently, we're in the planning phase of the next steps to raise awareness in Sumatra.

One man's trash is another man's treasure!

SOCIAL & ENVIRONMENTAL PROJECTS

SUSTAINABILITY AS RESPONSIBILITY, NOT MARKETING

For us, **social impact and environmental responsibility go hand in hand**. Supporting people while ignoring the climate crisis would be incomplete. In the same way, talking about sustainability without measurable action would not reflect who we want to be.

At Ticket to the Moon, we believe sustainability must be grounded in honesty, accountability, and science. It cannot just be a slogan or a decorative layer of branding. It has to be built into the way a organization operates, measures itself, and improves over time.

That is why **we have integrated carbon accounting** into our operations and **aligned our climate work with the Science Based Targets initiative (SBTi)**. This means that instead of guessing about our footprint, we are working to understand it properly — across our operations, materials, transport, and broader value chain. **By measuring our emissions and identifying where our biggest impacts lie**, we can focus our efforts where they matter most.

Our ambition is clear: **we want to reduce our carbon footprint significantly by 2030**, in line with science-based climate goals. This is not a vague aspiration. It is a structured process that requires data, analysis, operational change, and continuous follow-through.

TURNING CLIMATE GOALS INTO (DAILY) ACTION

Sustainability only becomes meaningful when it changes how you work every day. For us, that means transforming our operations from the inside out — starting at home, here in Bali.

One key area is **energy**. We have been expanding the use of **solar power** at our factory, making greater use of the abundant Indonesian sun to support our manufacturing processes. Each additional panel represents more than energy savings; it represents a practical **shift toward a more resilient and lower-impact production model**.

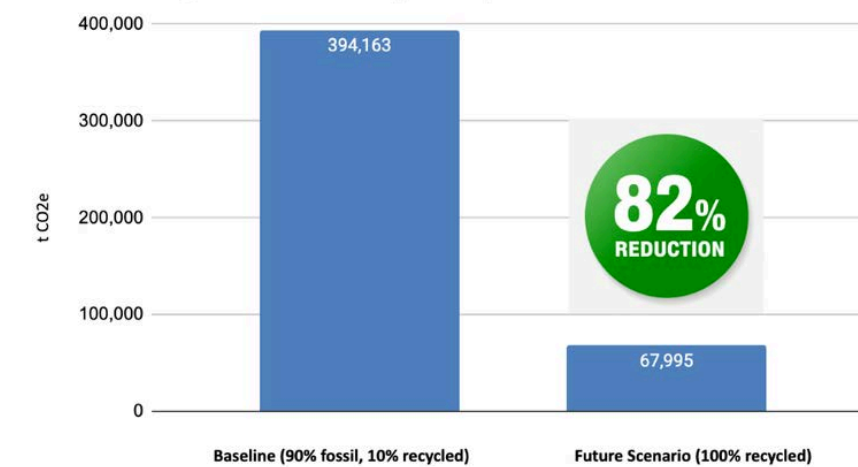

We are also working to rethink mobility. As part of this effort, we have introduced an **electric vehicle to our fleet**. What makes this especially meaningful is that it can be charged directly through our solar-powered system. This creates a strong link between renewable energy and

daily logistics, helping us reduce emissions not only in theory, but in the everyday movement of goods and people.

Another major focus is materials. A large part of any product's footprint lies in what it is made from. That is why we are **steadily increasing the use of recycled fabrics in our collections** and continuing to explore better material solutions year by year. From moving core product lines toward recycled nylon, aluminium, and **recycled polyester** to expanding our upcycled collections, including the **Re.vived Series**, we are actively working to close loops and reduce waste.

For us, this is about progress, not perfection. We know the journey is complex, and we know there is always more to do. But we also know that real change happens through consistent steps, taken seriously over time.
